# W. H. SCHIEFF ELIN & CO.'S

These elegant preparations have come into very general use, partly on account of their being more palatable than the salts made with mineral acids, partly because they were well adapted for combination with the valuable alkaloids, Quinine and Strychnine, and chiefly, we believe, because they have proven efficient remedies in many cases where other salts of iron have failed. For these reasons it is very important that these salts should be carefully made of proper, uniform and declared composition, and that the pharmacist and physician should have full knowledge of these facts. brief notes which we trust may prove of interest:

#### FERRI CITRAS. U. S. P.

FERRI ET AMMONII CITRAS.

These two salts are fully described in the U. S. Pharmacopœia, 1880. ammoniated citrate has much the larger sale, because of its quick solubility in cold water.

#### FERRI ET AMMONII TARTRAS. FERRI ET POTASSII TARTRAS.

The Potassium Salt is more handsome, less liable to variations in composition, and in much greater demand than the ammonium salt. By many physicians it is considered one of the best mild chalybeates.

#### FERRI ET QUININÆ CITRAS. FERRI ET AMMONII ET QUININÆ CITRAS.

The first of these two salts is fully described in the Pharmacopæia, 1880, pp. 159, 160. If made strictly according to the pharmacoposial formula, it is likely to be somewhat deficient in quinine, because the salt seems to hold some water of constitution not allowed for in the process laid down. We find it necessary, therefore, to make proper allowances and use more quinine, in order that the finished scales shall actually contain 12 per cent. Quinine (C<sub>20</sub>H<sub>24</sub>N<sub>2</sub>O<sub>2</sub>H<sub>2</sub>O). Every lot is assayed, and none sold containing less than 12 per cent. Quinine.

This salt is very slowly soluble in cold water, and is chiefly used in pills. ammoniated Citrate of Iron and Quinine is very popular, and is used in large quantities. The chief reason for this is that it is quickly and completely soluble in cold water, and is therefore easily dispensed in solution with other substances. There is no scaled salt in the market of such uncertain and widely varying composition. We have examined samples of foreign and domestic manufacture which varied in percentage of quinine from  $4\frac{1}{2}$  to  $11\frac{3}{10}$  per cent. We have also found considerable variations in different lots of the same brand. We have adopted the uniform standard of 10 per cent. and guarantee these scales to contain no less than that amount of pure quinine.

While this salt is not official in the Pharmacopæia, it has, we believe, just claims as a very valuable remedy. Our increasing sales justify us in recommeding it. In ordering specify CITRATE OF IRON AND QUININE, SOLUBLE.

## SCALED SALTS C

## FERRI ET STRYCHNIÆ CITRAS. U.S.P. FERRI ET OUINIÆ ET STRYCHNIÆ CITRAS.

Both Salts contain one per cent of Strychnine; the second, not officinal but widely used, contains also ten per cent of Quinine. Both are assayed by our chemist, and are guaranteed as represented.

## FERRI PHOSPHAS. U.S.P.

This scaled salt was newly introduced into the last edition (1880) of the U.S. Pharmacopæia. It closely resembles the well known pyrophosphate, is readily soluble in cold water, and is already in considerable demand.

## FERRI PYROPHOSPHAS. U.S.P.

The present Pharmacopæia has improved this preparation by omitting all ammonia and greatly simplifying the process. This salt is more constant, and does not decompose as readily as the former one. It, as well as the Phosphate, is especially adapted for use in elixirs and other liquids where it is desired to avoid the unpleasant

taste of the more acid preparations of iron.

The ten scaled Salts of Iron here described are the ones demanded at the present time. We prepare the full line and call especial attention to the following points:—

1.—Equal in beauty to any in the market.

2. Of strictly standard quality.

3. The label contains an unequivocal statement as to the amount of Quinine or Strychnine present: this statement is based, not on conjecture, but on the results of actual analysis.

We ask a careful examination and trial of these goods. See Manufacturing Department, page 109.

## W. H. Schieffelin & Co.'s

## CONCENTRATED NITROUS ETHI

FOR EXTEMPORANEOUS PREPARATION OF

#### SPIRITS NITROUS ETHER, U. S. P.

Per 1b., \$1.75.

This is pure, washed Nitrous Ether ( $C_2H_5NO_2$ ), prepared in accordance with the U. S. Pharmacopœia, 1880. It is a volatile ether of bright lemon-yellow color, and has a specific gravity of about 0.900 at 15° C.(59° F.)

#### FOR SPIRITS NITROUS ETHER, U.S. P., 1880.

Conc. Nitrous Ether, W. H. S. & Co., - - - - 1 lb. Alcohol, "95%," R

The product is 20 pounds of Spirits Nitrous Ether of the exact strength and quality prescribed by the Pharmacopeia. Mix.

The following are some advantages gained by buying this article:

I. A considerable saving in cost of freight and packages. 2. The druggist can say from his own knowledge that he is dispensing exactly

the article prescribed.

3. Sweet Spirits of Nitre may be prepared trequently in small quantity, and thus be fresh when dispensed.

4. The druggist can prepare his own spirits at the same cost as he can buy the spirits by the carboy.

# SULPHATE OF QUININE,

Put up in 1 ounce bottles and 5, 10, and 20 ounce cans,

AND

## BISULPHATE OF QUININE.

This salt is rapidly gaining popularity among physicians, owing to its ready solubility, in ten parts of cold water, and its more prompt and efficient action in cases where the ordinary Sulphate

of Quinine acts slowly or not at all.

We prepare the Bisulphate in fine, white crystals, convenient for dispensing. It is well adapted for use in Pills, Wafers, Elixirs, Syrups, Wines, and in most liquid mixtures. Its taste may be disguised by our Fluid Extract Licorice compound, or better, by our scaled Ammoniacal Glycyrrhizin.

Put up in I ounce bottles and 5, 10, and 20 ounce Cans.

Dose, same as the Sulphate.

We sell this salt at the ruling price for Sulphate of Quinine.

Special Quotations for large lots.

## W. H. Schieffelin & Co.'s

## CITRATE OF IRON AND QUININE.

(SOLUBLE.)

Your attention is called to the fact that we manufacture this preparation and guarantee it in the following particulars:

- 1. The scales are as handsome as any in the market.
- 2. They are quickly and completely soluble in water.
- 3. Every lot is assayed for the amount of contained quinine, and we guarantee every sample to contain not less than 10 per cent quinine, dried at 100° C. (212° F.)

As this preparation is not pharmacopœial, and owing to its being expensive, every maker has been "a law unto himself," In consequence, scales of a very similar appearance are sold in this country which vary in quinine strength from a minimum of 4½ per cent up. Believing that a uniform and known composition is desirable, we have introduced this line of preparations.

We would also call your attention to the fact that we make

## A FULL LINE OF SCALE PREPARATIONS.

See Manufacturing Department, page 109.

## W. H. Schieffelin & Co.'s

# OFFICINAL FLUID EXTRACTS.

Prepared from the choicest materials by repercolation, a process by which a much smaller loss of medicinal strength is incurred than by any other.

The sale of these extracts is steadily increasing, and we are adding to the list as the public demands, or the development of medical science renders proper.

See Manufacturing Department, page 101.

# W. H. Schieffelin & Co.'s ABSTRACTS.

We are prepared to furnish a full line of these new pharmacopoial powdered extracts, and the demand has already made it necessary to increase our list considerably.

Abstracts are all of one strength, viz: One grain of abstract represents two grains of the drug. They can usually be administered in doses of:

a. One-half the dose of the powdered drug.

b. One-half as many grains as the dose, in minims, of the fluid extract.

We prepare these abstracts with great care, from the best materials and without excessive heat. Should your trade demand them we shall be pleased to furnish them. Sold in ounces only unless specially ordered in larger bottles.

See Manufacturing Department, page 108.

# W. H. Schieffelin & Co.'s POWDERED EXTRACTS.

These Extracts are deservedly popular because of their convenience for dispensing purposes. Owing to the hygroscopic nature of most vegetable extracts, it is necessary that the bottles containing powdered extracts should be kept well corked. In nearly every case these Powdered Extracts represent the solid extracts from the same drugs, weight for weight, and should be prescribed in the same doses. The exact strength of each powdered extract is noted on the label.

Powdered Extracts should be kept in small, well corked bottles in a cool place. If heated or exposed to the air they are likely to "cake," and require drying and repowdering.

For the above reasons we put up these Powdered Extracts in 1 oz. bottles only; but we can furnish larger quantities at lower rates to those wishing them for immediate use.

See Manufacturing Department, page 107.

# W. H. Schieffelin & Co.'s TRITURATIONS.

This class of preparations, introduced into the new (1880) edition of the U.S. Pharmacopœia, consists of

THE MEDICINAL SUBSTANCE, I PART BY WEIGHT. POWDERED MILK SUGAR, 9 PARTS BY WEIGHT.

They must be intimately mixed and in the finest attainable state of subdivision. We test all our triturations with the microscope in order to be assured that these requirements are fully met.

See Manufacturing Department, page 132.

# W. H. Schieffelin & Co.'s PURE FRUIT JUICES.

SEASON, 1883.

We call attention to our Pure Fruit Juices, which are simply the undiluted juices of the fruit or berry. Their flavor is incomparably superior to those which are artificially prepared, and are also free from the objectionable and dangerous chemicals which such contain. They retain the delicate flavor of the fresh fruit, and if tightly corked will keep perfectly in all climates.

Catawba,	quart	Champ.	bottles,	-	-	per doz.

Red Currant,	4.6	1 66	66 /101	120	-	66	8	00

DIRECTIONS FOR MAKING RICH SYRUPS FROM THESE JUICES.—One part (by measure) of the Juice is to be mixed with four and a half parts of Syrup. These proportions may be varied to suit circumstances; if further diluted, they will still yield a rich Syrup. A greater degree of excellence and delicacy of flavor is imparted to these Syrups if, after mixing, they are placed on the fire and brought to active boiling, then promptly removed and strained.

#### W. H. Schieffelin & Co.'s

## SOLUBLE EXTRACT JAMAICA GINGER.

Per pint, 75 cents. Per 5 pint bottle, \$3.50.

This Extract of Ginger is one-third the strength of the Fluid Extract Ginger, U. S. P. (i. e., one fluid ounce represents 160 grains of Jamaica Ginger). It contains no Capsicum, and is miscible with water in all proportions without opalescence or precipitation, the resinous matter being removed, while the essential oil and pure flavor of the root are perfectly retained.

It is particularly desirable for preparing Syrup Ginger, U. S. P., Ginger Ale, Ginger Pop, Root Beer, and in the various requirements of the kitchen where Ginger is needed.

Formula for Syrup Ginger.—R Sol. Ext. Ginger, 3 fl. oz. Syrup Simple, 5 pts. Mix.

Formula for Ginger Ale Syrup.—R Sol. Ext. Ginger, 4 fl. oz. Tinct. Lemon Peel (8 oz. to pt.) rd. oz. Tinct. Capsicum, (if desired), 2 to 3 drs. Simple Syrup, 2 gallon. Mix. Citric Acid to taste (if wanted).

## W. H. Schieffelin & Co.'s

## OLEATES.

The demand for these preparations has steadily increased, owing to the fact that many physicians have found them more readily absorbed and more rehable as regards medicinal effects than are the ointments which they are partially superseding.

We manufacture a full line of Oleates of the best quality as per list below. We shall be pleased to receive your orders,

OLEATES.	ı lb. Jars. Per lb.	1/2 lb. Jars. Per lb.	1/4 lb. Jars. Per lb.	r oz. Jars. Per lb.

# OFFICINAL FLUID EXTRACTS.

W. H. SCHIEFFELIN & CO.'S

## SOLUBLE PILLS and GRANULES.

UNEQUALED FOR

Purity in Composition, Solubility in Coating, Uniformity in Size, Perfection in form and finish,

HAVE RECEIVED THE FOLLOWING FIRST PRIZES:

1878.-PARIS, SILVER MEDAL, FIRST PRIZE.

1879.- NEW YORK, AM. INSTITUTE, MEDAL OF SUPERIORITY.

1879.-SYDNEY, FIRST AWARD, BRONZE MEDAL.

1880.-MELBOURNE, FIRST AWARD, SILVER MEDAL.

1881.-MATANZAS, FIRST AWARD, SILVER MEDAL.

1881.-LONDON, INTERNATIONAL MEDICAL AND SANITARY EXHIBITION, AWARD OF MERIT.

We are constantly receiving unsolicited testimonials of the satisfactory results attending the use of these pills, from physicians in all sections of the country, with which the increasing calls for them from the trade is keeping pace.

Samples and price lists mailed upon application.

# SULPHATE OF QUININE,

W. H. Schieffelin & Co. brand, in tins and bottles.

# BI-SULPHATE OF QUININE

W. H. Schieffelin & Co. brand, in ounce bottles

OF GUARANTEED PURITY.

# NORWEGIAN COD-LIVER OIL.

The largely increased consumption, within the past six years, of Norwegian Cod-Liver Oil in bulk, has led to the sale of inferior and adulterated oils imported from Hamburg, Rotterdam, and other places, and put up in style similar to the genuine Norwegian Oil, so that now purchasers run the risk of having these inferior oils substituted for the genuine. It may be safely said buyers cannot be sure of getting the genuine article except by purchasing from reliable parties here who receive it direct from the place of manufacture.

We have given this article much attention for some years past, having been the first here to import it largely direct from Norway, and we have recently made arrangements to receive regular supplies of a brand which our extensive experience in the article justifies us in guaranteeing to be perfectly pure, and of a quality superior to any Norwegian Cod-Liver Oil imported in bulk. Parties ordering will please specify the above brand, and may rest assured of receiving an article of uniform purity and freshness.

(1887) All the genuine Oil of this make will bear the above brand, whether put up in original tin-lined barrels or in cans.

W. H. Schieffelin & Co.

# Sam'l Kidder & Co.'s Rochelle Salt, Seidlitz Mixture, Sup. Carb. Soda, Tartaric Acid.

The attention of druggists is called to the above preparations, which have for many years enjoyed an enviable reputation. The Sup. Carb. Soda, which is superior to the best English brands, will be found to be a very desirable article, either for medicinal or family uses. The difficulty in supplying the demand which has heretofore existed will no longer be felt, as we are prepared to supply them in any quantity. All orders will be promptly executed. We quote as follows:

Kidder's	Rochelle Salt, in 50 lb. boxeslb.	, 33	cents.

NO CHARGE FOR BOXES OR BARRELS.

# W. H. Schieffelin & Co.,

PROPRIETORS OF THE ABOVE PREPARATIONS OF

SAMUEL KIDDER & CO.

# SOLUBLE PILLS AND GRANULES,

UNEQUALLED FOR

Purity in Composition, Solubility in Coating,
Uniformity in Size, Perfection in Form and Finish.

We desire to call the attention of physicians and others to the following points:

- 1. The best materials are used in their manufacture.
- 2. No article required by a formula is on itted on account of its high cost.
- 3. No Pills are deficient in weight.
- 4. The Pills are Coated while soft.
- **5.** There is but one Coating, which is perfectly soluble, and there is no sub-coating of resinous character.
- 6. The Coating is so thin that the Pills are not perceptibly increased in size, and yet it is entirely sufficient to protect the Pills from atmospheric influences; and effectually covers any nauseous taste, thus rendering the Pill easy to be swallowed.
- 7. The Coating is so transparent as to clearly reveal the color of the mass, and its solubility is not impaired by age.
- 8. The various masses are so thoroughly worked that the materials are perfectly distributed.
- 9. Vegetable or organic matters are not charred, nor are volatile principles lost by the application of heat at any time throughout the process of manufacture.
- 10. The excipients are peculiarly adapted to the permanent solubility of the mass and its efficient therapeutic action.

Particular attention is called to our GRANULES of MORPHINE, STRYCHNINE, ARSENIOUS ACID, and other powerful remedies, which are prescribed in minute doses. The desirability of having these medicines in this shape, accurately weighed and ready for administering, has long been recognized.

Our list of Pills and Granules embraces those made according to the formulæ of the U.S. Pharmacopæia; also most of those in common use among the profession.

We have taken every precaution to insure accuracy in weight, and can give assurance that in this, as in other particulars, they can be implicitly relied upon.

We shall be happy to supply samples upon application.

See Manufacturing Department, pages 114 to 123.

W. H. Schieffelin & Co.'s Chemical and Pharmaceutical Preparations.	
W. H. Schieherin & Co. s Chemical and Pharmaceutical Preparations.	

We have pleasure in presenting to our numerous friends and correspondents our General Prices Current, revised and corrected to date, with the addition of many new articles and remedies, the result of the progress of Chemical and Pharmaceutical Science. The new Pharmacopæia of the United States contains certain new preparations and requires greater purity in nearly every case; and, anticipating a large demand for really first-class Laboratory Products which shall meet the strictest requirements of the new Pharmacopoxia, we have greatly increased our manufacturing facilities, and the present edition embraces a much larger number of Chemical and Pharmaceutical Products of proper strength and purity, as well as Fancy Goods and Druggists' Sundries, than those we have formerly issued-all of which we have endeavored to arrange in such a manner as to be easily understood by those for whom it is particularly designed. The constant changes in market value of many articles demand a frequent revision and republication of rates, and it will be understood that the prices quoted are subject to changes in the market, and not to be considered binding in case of change in value, or if our stock of any article has become exhausted prior to the receipt of an order. In many articles the prices, necessarily, are approximate only; but we have endeavored, as near as possible, to affix correct rates, while at the same time our customers will have the benefit of any decline in prices, and proper allowance for goods ordered in large quantities and original packages.

Druggists' Sundries and Fancy Goods.—We desire to call special attention to this department, which we have enlarged very materially, embracing as it now does a complete stock of Druggists' Sundries, Fancy Goods, Surgical Instruments, Perfumery, Toilet Articles, Sponges, etc., etc. Our long and large experience in this class of goods, combined with our connections in the best centres of supply in Europe and at home, places us in a position whereby we are enabled to assure our friends with confidence, that they will find it to their interest to inspect our stock or send for prices before purchasing elsewhere. See Descriptive Price-List commencing on page 27.

Manufacturing Department.—We are constantly enlarging our facilities in this important branch of the Drug business, and our Specialties, comprising Abstracts, Fluid Extracts, Powdered Extracts, Solid Extracts, Elixirs, Fruit Juices, Soluble Pills and Granules, Sulphate and Bisulphate, Quinine, Scale Preparations, Triturations, etc., are daily increasing in demand, which we consider conclusive evidence that real meritorious articles are appreciated by discriminating buyers and consumers. We shall continue to devote our time and best energies to these articles and to the production of new ones, as Chemical and Pharmaceutical Science may suggest. See Manufacturing Department, pages 95 to 135.

Powdered Drugs.—We have recently added to our facilities for powdering drugs several of the most approved mills and chasers, in order that we may furnish uniform powders. We guarantee ALL our ground and powdered drugs to be of strictly pure quality, and equal to the so-called Select Powders.

Terms Cash, in funds current in New York. The experience of all persons engaged in business during the past lifteen years has satisfied them of the evils of a return to the former system of long credits, and we shall therefore continue to confine our sales to a cash basis, as for some years past. We may, however, say in this connection, that, as in the past, so in the future, we will be pleased to extend any reasonable facilities to our friends when occasion requires. Parties with whom we have had no previous business relations, and with whom we have not the pleasure of a personal acquaintance, will facilitate the execution of their orders by accompanying them with drafts to cover approximate amounts of the same, or with references.

We avail ourselves of the present opportunity to call special attention to the importance of knowing the quality of the goods dealt in. Every year affords evidences of the ingenuity and industry of those who are so auxious to make money and so desirous of meeting the demand for love prices, that they are induced to buy and sell adulterated goods and goods of an inferior quality, regardless of the want of morality involved in such a course, and of the suffering and risk attending the sale and dispensing of such goods. Of course, those who intrust the execution of their orders to parties whose only criterion is the price, can have no guarantee of the quality of the articles bought.

Our experience, and that of our predecessors for nearly a century, justifies us in believing that our rule, to sell only goods of reliable quality, and at prices which afford a fair profit, is the only correct one. Our extensive connections with all the markets abroad and at home, afford us facilities for supplying our stock with such goods on the most favorable terms.

In conclusion, parties who may favor us with their orders, whether for large or small quantities, may be assured of our best terms, and of prompt attention. Special quotations will be given with pleasure.

I nese Juices are equal, it not superior, in quality	to	0 00	
the best imported. They are simply the pure un	O-1-		
luted juices of the fruit; their flavor is incomparab	DIY		

superior to those which are artificially prepared, and they are also free from the objectionable and dangerous chemicals which such contain. They retain the delicate flavor of the fresh fruit, and if tightly corked will keep perfectly in all climates.

DIRECTIONS FOR MAKING SYRUP FROM THESE JUICES.

One part (by measure) of the Juice is to be mixed with four and a half parts of Syrup. These proportions may be varied to suit circumstances; if further diluted they will still yield a rich Syrup. A greater degree of excellence and delicacy of flavor is imparted to these Syrups, if, after mixing, they are placed on the fire and brought to active boiling, then promptly removed and strained.

### CONCENTRATED MEDICINES;

OR

#### Active Principles of Medicinal Plants.

The list embraces many preparations from Crude materials of recognized officinal medicinal value. Others, though comparatively new to the profession, are fast gaining confidence in their remedial powers.

Each preparation represents the full therapeutic virtues of the crude substance from

which it is derived.

They are definite in constitution and therapeutic power, uniform in medicinal strength,

reliable in clinical practice, and not liable to vary, change, or deteriorate by age.

They are put up in bottles of one ounce avoirdupois, and securely sealed to protect them from the action of the atmosphere.

Subject to a discount of 30 %, excepting Podophyllin and Leptandrin, which are net.

#### GARDNER'S CHEMICALLY PURE

#### PREPARATIONS. HYPOPHOSPHITE

The experience of the past six years in the use of these preparations of chemically pure. Hypophosphites by the medical profession has fully vindicated the statement made by the writer in 1874, when they were first introduced, and at that time strongly urged upon their critical attention, viz.: That "unless the Physician has used chemically pure Hypophosphics, he has not properly tested their effects." The marked superiority of pure over impure salts in therapeutic effects has been recognized and appreciated by the medical profession, and, as usual, preparations purporting to be similar have been extensively advertised. These are generally compounds, in the use of which the Physician is left no discretion of judgment in the selection of the salts best adapted to the condition of his patient.

# Gardner's Unalterable Syrup of Hydriodic Acid.

This Syrup has been remarkably useful in Asthma, Chronic Bronchitis, and Hav Fever. (See papers by J. P. Oliver, M.D., Boston, "Med. and Surg. Journal," March 4, 1880, and by W. Gill Wylie, M.D., New York, "Medical Record," May 10, 1879.) While it has been found specially useful in these diseases it is applicable to all that large class of affections where the assimilation of Iodine is indicated, as in chronic and subacute catarrhal affections, Goitre, Adipose Tumors, Syphilis, chronic Malarial Poisoning, etc. For highly favorable results in Acute Rheumatism, see N. V. Medical Record, April 21st, 1883, p. 448.

NOTE,—Physicians desiring to prescribe this preparation will please specify "Gardner's," as imitations of it have been used in a decomposed state with serious results, disappointing the anticipations of the Physician, and creating undeserved prejudice against this remedy.

the anticipations of the Physician, and creating undeserved prejudice against this remedy.

#### C. T. RAYNOLDS & CO.'S

Fresco and Decorative Water Colors.

#### DAVID B. CROCKETT'S

No. 1. "Preservative" or Architectural Wood Finish, for preserving and finishing wood of all kinds in their natural color and beauty. Price, \$2.50 per gallon.

#### DAVID B. CROCKETT'S

Genuine Spar Composition. Price reduced to \$4 per gallon. A superior article for all exterior bright work on Vessels and Spars, or as a Tough Elastic coating on Wood or Iron exposed to the different extremes of Weather, being positively Water Proof.

For interior finish on Yachts, Steamboats, &c., use CROCKETT'S No. 2 "PRESERVATIVE."
Put up in ¼, ½, 1, 2 and 5-Gallon Cans. No charge for Packages.

#### SPECIAL NOTICE.

I have made arrangements to manufacture for Messrs. C. T. RAYNOLDS & Co. my Spar Composition, as well as all other goods formerly manufactured by me. They can only be obtained through this house or parties buying of them; and none are GENTINE unless bearing my PATENTED TRADE MARK ON EVERY PACKAGE. Respectfully yours,

#### VARNISHES.

"STANDARD" FINISHING VARNISHES, FOR COACHES AND CARS.		
WEARING BODY VARNISH.  For finishing the Bodies of Coaches and Cars; of our make, we claim to be superior in durability, lustre, flowing and color, in all respects equal, and in some superior, to the best imported. Sets in six hours free from dust, and dries hard in three days.	gall.	4 50

## W. H. SCHIEFFELIN & CO.'S PHARMACEUTICAL PREPARATIONS.

THE

## Pharmacopæia

OF THE UNITED STATES

Contains certain new preparations, and requires greater purity in nearly every case. Anticipating a large demand for really first-class LABORATORY PRODUCTS, which shall meet the strictest requirements of the new Pharmacoporia, we have greatly increased our MANU-FACTURING FACILITIES, and can now offer a large line of proper strength and purity.

#### SPECIALTIES:

#### FLUID EXTRACTS.

In accordance with the new requirements, each cubic centimetre represents one gramme of powdered drug, or each minim represents 95-100 grain of powdered drug. As the strength of these preparations has not been materially changed, the doses need not be changed. Our Fluid Extracts are made by repercolation without heat, of full strength, and from good materials, with solvents adapted to the individual drugs.

#### SOLID EXTRACTS.

Excessive heat is avoided, and these extracts fully represent the soluble active constituents of the powdered drugs.

#### POWDERED EXTRACTS.

Of the same strength as the Solid Extracts, and in many cases more convenient for dispensing. Our line includes all for which there is a demand.

#### ABSTRACTS.

A Class of Powdered Extracts introduced into the new Pharmacopoeia. One grain of Abstract represents two grains of powdered drug. Dose:—One-half that of the drug, or one-half as many grains as the dose, in minims, of the fluid extract. The simple relation between the dose of drug and of abstract, will, we believe, commend this new class of preparations to We can now furnish a considerable number of abstracts, and will manufacture all for which a demand arises.

#### SCALE PREPARATIONS.

All scales containing Quinine, Strychnine, or other alkaloids, are assayed by our Chemist, and we guarantee them to contain the full amount of alkaloid stated on the labels. We call especial attention to the following:

Citrate of Iron and Quinine, U. S. P.—12 per cent, Quinine, no Ammonia, slowly but com-

pletely soluble in water; color, ruby-red.

Citrate of Iron and Quinine, Soluble.—10 per cent. Quinine, with Ammonia, very freely soluble in cold water; color, light green.

Citrate of Iron and Ammonium, U.S.P.; Citrate of Iron and Strychnine, U.S.P.; Citrate of Iron, Quinine and Strychnine—10 per cent. Quinine, 1 per cent. Strychnine with Ammonia. All other scales of the Pharmacopœia.

#### TRITURATIONS.

This class of preparations, introduced into the new (1880) edition of the U.S. Pharmacopœia, consists of the

> MEDICINAL SUBSTANCE, I PART BY WEIGHT.

POWDERED MILK SUGAR, 9 PARTS BY WEIGHT.

They must be intimately mixed and in the finest attainable state of subdivision. We test all our triturations with the microscope in order to be assured that these requirements are fully met.

#### MISCELLANEOUS.

Purified Salts, Bi-Sulphate of Quinine, Sweet Spirits of Nitre, Iron Preparations, Purified Chloroform, Pepsin, Oleates, etc.

For all of the above preparations, see Manufacturing Department, page 95 to 135.

#### ELIXIRS, W. H. SCHIEFFELIN & CO.'S.

The desire to disguise the bitter or nauseous taste of various valuable medicines without diminishing their medicinal activity, has led to the manufacture and use of chairs. We have endeavored to make these preparations as palatable as is possible without sacrificing the quality or quantity of the active ingredients. We use the best and purest materials only, and guarantee that these elixirs are as represented.

Valerianate of Ammonia and Quinia  One teaspoonful contains two grains of Valerianate of Ammonium, and one grain of Quinine.		00	3	60	8	40	12	00

#### Elixirs of Chemically Pure Hypophosphites (Gardner's).

Instances are common where Syrup is not acceptable to the stomach, owing to excessive sweetness, Spirit is in most cases an important adjuvant to the hypophosphites, and co-indicated with them, assisting their tonic action, and correcting the cloying effect of sugar on the palate, while preventing the formation of mould and arresting fermentive decomposition in preparations containing it. It is therefore desirable to administer these salts combined with a small but sufficient proportion of spirit to effect the above objects.

These Elixirs combine the above advantages, and have been found uniformly acceptable in cases where the Syrup has been rejected.

Special attention is called to the fact that Chemically Pure Salts are prepared expressly for these Elixirs.

#### ETHER, NITROUS, CONCENTRATED.

For extemporaneous preparation of Spirits Nitrous Ether, U. S. P., per lb., \$1 75.

This is pure, washed Nitrous Ether (C2H6NO2), prepared in accordance with the U. S. Pharmacopoia, 1880. It is a volatile ether of bright lemon-yellow color, and has a specific gravity of about 0.900 at 15° C. (59° F.)

#### FOR SPIRITS NITROUS ETHER, U. S. P., 1880.

R Conc. Nitrous Ether, W. H. S. & Co...... 1 lb. 

The product is 20 pounds of Spirits Nitrous Ether of the exact strength and quality prescribed by the Pharmacopæia.

The following are some advantages gained by buying this article.

I. A considerable saving in cost of freight and packages.

2. The druggist can say from his own knowledge that he is dispensing exactly the article prescribed.

3. Sweet Spirits of Nitre may be prepared frequently in small quantity, and thus be fresh

when dispensed.

Assorted....

4. The druggist can prepare his own spirits at the same cost as he can buy the spirits by the carboy.

EXTRACTS, Flavoring, W. H. Schieffelin & Co.'s.

We beg to call particular attention to the following
Natural Flavoring Extracts, which have elicited the
highest commendations from parties who have used
2 0Z. and sold them, viz. Allspice, Almonds, Celery, Cinnamon, Cochineal, Ginger, Jamaica, Lemon, Mace, Nutmegs, Orange, Rose, Sarsaparilla, " Tonqua Vanilla, " Vanilla,

.....doz. 2 00 3 50 10% discount by the gross.

#### SOLUBLE EXTRACT JAMAICA GINGER. Per pint, 75 cents. Per 5 pint bottle, \$3 50.

This Extract of Ginger is one third the strength of the Fluid Extract Ginger, U. S. P.

(i.e., one fluid ounce represents 160 grains of Jamaica Ginger). It contains no Capsicum, and is miscible with water in all proportions without opalescence or precipitation, the resinous matter being removed, while the essential oil and pure flavor of the root are perfectly retained.

It is particularly desirable for preparing Syrup Ginger, U. S. P., Ginger Ale, Ginger Pop, Root Beer, and in the various requirements of the kitchen where Ginger is needed.

Formula for Syrup Ginger.—B. Sol. Ext. Ginger, 3 fl. oz. Syrup Simple, 5 pts. Mix. Formula for Ginger Ale Syrup.—B. Sol. Ext. Ginger, 4 fl. oz. Tinct. Lemon Peel (8 oz. to pt.), 1 fl. oz. Tinct. Capsicum (if desired), 2 to 3 drs. Simple Syrup, ½ gallon. Mix. Citric Acid to taste (if wanted).

#### EXTRACTS, FLUID, W. H. SCHIEFFELIN & CO.'S.

These Extracts are made to conform in strength with the new (1980) edition of the U.S. Pharmacop via, viz.: Each cubic continuers of Fluid Extract contains the soluble constituents of one gramme of the forcional drug. These proparations vary but slightly, as regards strength, from the Fluid Extracts official in previous editions of the Pharmacop gia, being in every case about five per cent, weaker, or in other words, each minim represents 65.100 grain of the powdered drug. It will be seen that only in exceptional cases, if any, will it be necessary to increase the dose. We have taken great pains to compile, from the highest authorities, a list of the average doses. These doses, together with many practical formule for the preparation of Syrups, Timetures, Wines, etc., are printed up on the labels. It has seemed advisable to give doses and quantities by weight and measure in both the apothecaries and the metric systems.

The process employed is that of cold repercolation. We believe this to be the best pro-

cess yet devised, for the following, among other, reasons: I. All injurious effects produced by heat are avoided.

2. The a paid which extracts the soluble constituents of a drug is the one best adapted to hold those sub-times, in permanent solution. All processes employing heat modify the com-position of the solvent to a greater or less extent, and thus render the Fluid Extract thus prepared subject to various troublesome changes and precipitations.

We use pure drugs only, and employ skilled labor, thus affording every guarantee that

our Fluid Extracts shall be of uniform strength and purity.

New Fluid Extracts are added to our List as the public demands or the developments of medical science render proper.

\*As the effects of Ergot are due to several rather than any one active principle contained in the drug, the term "Ergotin" is misapplied, and "Extract Ergot" is more appropriate.

We have been making this for some time past by an improved process, and have had it subjected to

critical tests with the most satisfactory results

3 grains of Extract represent 24 grains of Ergot.

#### EXTRACTS, POWDERED, W. H. Schieffelin & Co.'s.

These Extracts are deservedly popular because of their convenience for dispensing purposes. Owing to the hygroscopic nature of most vegetable extracts, it is necessary that the bottles containing powdered extracts should be kept well corked. In nearly every case these Powdered Extracts represent the solid extracts from the same drugs, weight for weight, and should be prescribed in the same doses. The exact strength of each powdered extract is noted on the label

Powdered Extracts should be kept in small, well corked bottles in a cool place. If heated or exposed to the air they are likely to "cake," and require drying and repowdering.

For the above reasons we put up these Powdered Extracts in 1 oz. bottles only; but we can furnish larger quantities at lower rates to those wishing them for immediate use.

#### ABSTRACTS, W. H. Schieffelin & Co.'s.

This new class of powdered medicinal extracts has been introduced into the last (1880) revised U. S. Pharmacopæia. All Abstracts are so prepared that one purt of the finished preparation shall represent two parts of the powdered crude drug. Consequently the dose of an Abstract may be considered about one-half that of the crude drug or the fluid extract. We are prepared to furnish all the Pharmacopæial Abstracts, and will prepare others as may be demanded.

Abstracts should be kept in small, well corked bottles in a cool place.

Like powdered extracts, Abstracts are likely to "cake" from excess of heat or moisture. For this reason we offer them regularly in 1 oz. bottles only; but parties wishing them for immediate use can obtain them in larger quantities at lower rates.

#### IRON PREPARATIONS.

We make a full line of *Scale Preparations* of Iron, and guarantee them to be strictly as represented. All scale preparations containing Quinine, Strychnine, or other valuable or dangerous alkaloids are assayed, thus preventing mistakes and ensuring the full quantity of valuable alkaloids.

#### OLEATES, W. H. Schieffelin & Co.'s.

Medication by the external application of Metallic Oleates is of comparatively recent date, and, owing to favorable results, is rapidly extending. The Oleates, so-called, which were first used were prepared by dissolving the metallic oxide in excess of commercial oleic acid. These preparations proved unstable and failed to give satisfaction. It was then proposed to make the Oleates of the heavy metals by precipitation of their soluble salts with soluble Oleates. It was found that Oleates thus prepared could be dissolved in oleic acid to produce preparations of uniform percentage strength, and it was further found that they were more permanent and medicinally more reliable.

The number of Oleates was greatly increased, and some little confusion was occasioned by the varying strength prescribed.

We give below a list of Oleates chiefly used, and can fill orders for others as may be needed. Where no strength is specified the precipitated dry Oleate is meant. The percentages refer to the amounts of metallic oxides represented.

OLEATES.	r lb. Jars. Per lb.	lb. Jars. Per lb.	14 lb. Jars. Per lb.	r oz. Jars. Per lb.

#### PEPSIN, W. H. Schieffelin & Co.'s.

We sell no untested Pepsin under our own brand. We guarantee that our *Pure Pepsin* will digest over 200 times its weight of freshly coagulated egg albumen, when tested according to the method of the new U. S. Pharmacopœia given below.

In like manner we warrant our Saccharated Pepsin to digest 50 times its weight of freshly coagulated egg albumen, as required by the U. S. Pharmacopœia.

# W. H. Schieffelin & Co.'s SOLUBLE PILLS AND GRANULES,

UNEQUALED FOR

Purity in Composition,

Solubility in Coating, Uniformity in Size,

Perfection in Form and Finish.

PARIS EXPOSITION, 1878.
The only highest "Recompense" awarded to Pills.

MEDAL OF SUPERIORITY.

American Institute, New York, 1879.

FIRST AWARD. Sydney, New South Wales, 1879.

SILVER MEDAL. Melbourne, Australia, 1880.

- 1878. PARIS. THE ONLY SILVER MEDAL. THE HIGHEST RECOMPENSE AWARDED TO PILLS.
- 1879. SYDNEY, NEW SOUTH WALES. FIRST AWARD.
- 1879. NEW YORK, AMERICAN INSTITUTE. MEDAL OF SUPERIORITY.
- 1880, MELBOURNE, AUSTRALIA. FIRST AWARD.
- 1881, -- MATANZAS, CUBA. -- SILVER MEDAL.
- 1881. LONDON. THE ONLY AWARD OF MERIT FOR PILLS ALONE AT THE INTER-NATIONAL MEDICAL AND SANITARY EXHIBITION.
- 1881. BRIGHTON, ENGLAND. ONLY AWARD FOR FILLS AT THE SCIENTIFIC AND SANITARY EXHIBITION.

These Pills are the result of several years' study of the subject, during which time each defect, as it became manifest, has been met and overcome, until finally we feel that we can safely assert

that they fully meet all requirements.

We guarantee that their action will be as prompt and thorough as any uncoated pill that can be made, while they possess the advantages over pills not coated that they can be swallowed without taste, that the soluble condition of the mass is preserved by exclusion from atmospheric contact, and that substances like Proto-Salts of Iron, Phosphorus, etc., are effectually protected from oxidation.

THE CONTING is an inert, soluble compound, dissolving upon the longue in all cases almost instantly, entirely TASTELESS, perfectly TRANSPARENT and COLORLESS, thus disclosing to the eye the exact color and appearance of the pill-masses.

In our TRANSPARENT CONTING is secured a highly important advantage over pills on which opaque coatings, like sugar, etc., are employed. In sugar, Pills of Quinine, Bin-lod. Mercury, lodoform, Cathartic Comp., and all others have precisely the same outward appearance, while with our coating each pill has a distinctive color: the Quinine Pill is white; the Bin-lod, Mercury red; the lodoform yellow, and the Cathartic Comp., if the U.S.P., is a rich brown, or if the "Improved," it is a black.

Our coating, therefore, affords an almost infallible safeguard against mistakes in substituting one pill for another, either in pulting up or in dispensing. In addition to this the uniformity in shades of the characteristic colors of the various pills furnishes conclusive evidence of the perfect dissemina-

tion and subdivision of the materials used.

THE COATING is so thin that it scarcely increases the size of the pill, thus securing as small a bulk as the quantity of material will admit, while its application is so even that no inequalities

The coating being dried by evaporation in a current of cold air, vegetable or organic matters

are not charred, nor are volatile principles lost.

EVERY PILL is perfectly round; each pill of the same variety corresponds with its neighbor exactly in size and weight.

THE MATERIALS used in forming the various masses are INVARIABLY the BEST the market affords, weighed with scrupulous exactness, combined so thoroughly that the medicinal matter is perfectly diffused throughout the mass.

THE EXCIPIENTS employed are such as are best adapted to permanently secure a soft soluble condition of the mass.

Our Pills can be procured from all the leading druggists in the country, or can be ordered direct from us. Samples furnished if desired. Price-List and Formula-Book mailed to any address. Private formulas of not less than three thousand pills made up, and estimates furnished.

Dealers will please observe that we do not supply our pills except in bottles of 100 and 500. It is obvious that this rule is necessary in order that they may be recognized as pills of our manufacture.

#### POWDERED DRUGS.

\*\*\* We have always made a specialty of preparing and offering for sale none but pure and first-class Powders, adapted to the uses of Physicians and Pharmacists; and we would beg to call the attention of the Trade to their character, and to solicit orders for them.

In addition to keeping these articles in bulk, for the Jobbing Trade, we have them in Boxes of 25 lbs. and 50 lbs. for the Wholesale Trade. We also put them up in Flint-Glass Bottles of 1 lb. each, securely corked and capped with tin-foil, adapted to Prescription uses, and for transportation to climates where a humid atmosphere prevails.

Prices furnished on application.

#### POWDERED OPIUM.

Every package of Powdered Opium sold by us bears a label indicating the percentage of Morphine as determined by actual assay.

Quinine, Sulphate, W. H. S. & Co.'s., 1 cz. bots	
" 5, 10 and 20 oz. tins	I 80
"  This salt is rapidly gaining popularity among physicians owing to its ready solability in ten parts of cold water, and its more prompt and efficient action in cases where the ordinary Sulphate of Quinine acts slowly or not at all.  We prepare the Bi-Sulphate in fine white crystals convenient for dispensing. It is well adapted for use in Pills, Wafers, Elizers, Syrups, Wines, and in most liquid mixtures. Its taste may be disguised by our Fluid Extract Liquorice Comp., or better by our Scaled Ammoniacal Glycyrrhizin. Dose same as the Sulphate. Special quotations for large lots.

#### REAGENTS.

#### TEST SOLUTIONS, ACCORDING TO THE NEW U. S. PHARMACOPŒIA.

The new Pharmacopæia requires greater purity in acids, salts, and preparations generally, and prescribes certain reagents of definite strength to be used in testing. A demand has arisen, in consequence, for reagents to be used in applying pharmacopæial tests, and we have made arrangements to furnish complete or partial sets, as may be desired, at reasonable rates. We use none but the best pure chemicals which can be obtained.

The qualitative reagents are made in exact accordance with the Pharmacopœia, and the

volumetric solutions are exactly standardized.

Below is a list of the reagents which we can supply; any others which our customers

may desire can be furnished on short notice.

We are prepared to put these up in sets to suit, in 4-oz. glass-stoppered, flint bottles, with paper labels. Or we can furnish the ones designated by a star (\*), in sets of forty, in 1/2-litre (41/2 fl. oz.) bottles, with labels blown in the glass—decidedly the best medium-priced reagent bottles in the market. Additional bottles of the same style, with blank spaces for labels, can be furnished to those desiring larger sets.

## SYRUPS, W. H. Schieffelin & Co.'s.

These Syrups are put up in uniform style with our Elixirs and Wines. Their thorough reliability in quality, and the skill and care used in their preparation will commend them to all consumers.

	Pe	ints, r doz	Q	arts,	5 e:	Pts.,	G e:	all.,
Hypophosphites Lime and Soda	8	00	1	20	, 2	75	5 4	00
Hypophosphites Lime Soda and Potass  This is the Syrupus Hypophosphitum, of the new Pharmacopagia. It contains 3.5 per cent. Hypophosphite of Calcium, and 1.2 per cent. each of Hypophosphites Sodium and Potassium.	8	00	1	20	2	75	4	. 00
Hypophosphites Lime Soda, Potass. and Iron  The U. S. P., Syrupus Hypophosphitum cum Ferro. It contains 1 per cent. Lactate Iron, in addition to the substances contained in Syrupus Hypophosphitum, U. S. P.	8	00	I	20	2	75	4	. 00
Iodide Calcium	15	00	2	25	5	25	7	50
One dessertspoonful contains two grains of Iodide of Calcium.								
Lactophosphate Iron	15	00	2	25	5	25	7	50
Lactophosphate Iron and Lime	15	00	2	25	5	25	7	50
One dessertspoonful contains two grains of Precipitated Phosphate of Lime, one grain of Ferrous Phosphate, and Lactic Acid.							ĺ	
One dessertspoonful contains two grains of Precipitated Phosphate of Lime, one grain of Ferrous Phosphate, one-half grain of Phosphate of Potash, and Lactic Acid.	8	00	2	70	6	50	9	00
Cactophosphate of Iron, Lime, Potash and Soda  One dessertspoonful contains two grains of Precipitated Phosphate of Lime, one grain of Ferrous Phosphate, one-half grain each of Phosphates of Potash and Soda, and Lactic Acid.	8	00	2	70	6	50	9	00
actophosphate Lime  One dessertspoonful contains two grains of Precipitated Phosphate of Lime, and Lactic Acid.	5	00	2	25	5	25	7	50
actophosphate of Lime and Pepsin	0	00	3	00:	7	00	IO	00
One dessertspoonful contains two grains of Precipitated Phosphate of Lime, two grains of Pepsin, and Lactic Acid.					,			
Phosphates, Compound (Chemical Food)  One teaspoonful contains one grain of Ferrous Phosphate, two grains of Precipitated Phosphate of Lime, one grain of Phosphate of Soda, one-half grain of Phosphate of Potash, and Phosphoric Acid.	8	00	I	20-	2	80	4	00
Phosphates of Iron, Quinine and Strychnine 2	4	00	3	601	8	40	12	00
(A MODIFICATION OF EASTON'S FORMULA.)  One teaspoonful contains two grains of Ferric Phosphate, one grain of Quinine, and one-sixtieth of a grain of Strychnine, with Phosphoric Acid.						1		
Superphosphate of Iron	Q	00	_	00	0	Jon per		00
One teaspoonful contains three grains of Ferrous Phosphate, with Phosphoric Acid.	J	30	I	20	2	/5	4	00

#### TRITURATIONS, W. H. Schieffelin & Co.'s.

This class of preparations, introduced into the new (1880) edition of the U. S. Pharmacopoeia, consists of

THE MEDICINAL SUBSTANCE, I PART BY WEIGHT. POWDERED MILK SUGAR, 9 PARTS BY WEIGHT.

They must be intimately mixed and in the finest attainable state of subdivision. We test all our triturations with the microscope in order to be assured that these requirements are fully met.

#### QUINLAN'S PATENT NOVELTY DRAWER-PULL.

Plain White Glass Label..... ...... piece,

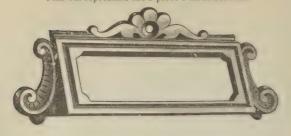

FIGURE 1.

On account of some objections being made to our old Pull, as persons state they could not read it readily when placed on the bottom row of drawers, we have thought it well to introduce the above Pull, which has a projecting angle. It is composed of three parts, and when adjusted appears as Fig. 1. A similar Pull, made to imitate OUR PATENT has been in the market, but in pulling heavy Drawers, the outer frame is liable to

fall off and is apt to break the label. In this Pull this is avoided by a small screw, which fastens the same together.

This cut represents the 2-piece Pull in sections.

Finished in Italian Antique French Bronze.

Complete with Glass Labels.....per doz., \$2 50

### QUINLAN'S PATENT CONVEX DRAWER-PULL. Entirely New.

The construction of this Pull is entirely different from any other style now manufactured, being more ornamental in appearance, novel and compact in design. It consists of a handsomely moulded metal frame (Bronze, Antique, or Nickel) holding a convexo-concave metal plate with a correspondingly curved heavy glass label, which can be lettered in any style. This curve-shaped label in Pull affords ample room for writing the longest names, with little or no abbreviations—two or more lines of writing being sometimes requisite to indicate contents of drawer. (This cannot be done with any other Pull made.) The curved Pull label can also be read distinctly in any position and at a greater distance than any other now made. The finger or pull-rest is placed under the glass label, thereby economizing space, and thus rendering this Pull the most desirable in the market.

Female ......doz. 15 00 | Male. ......doz. 15 00 A liberal discount to the trade.

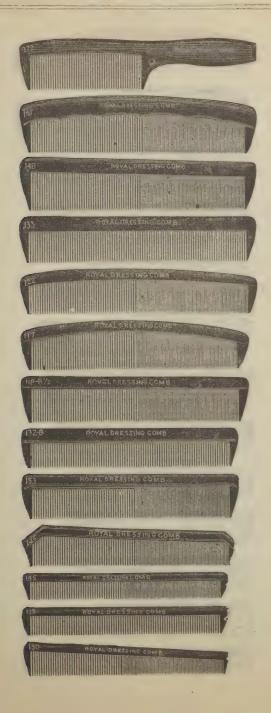

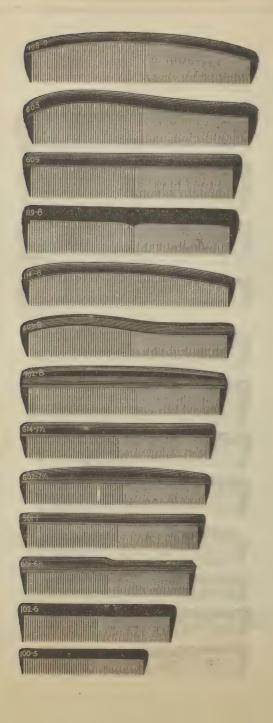

Being uniformly porous, it allows the heat from the insensible perspiration of the body to pass freely away, at same time being invulnerable to air or cold. This alone places these Protectors in advance of all others.

The Female Chest Protector is modelled after the female form into a graceful shape, which it retains, and therefore improves the figure without the aid of corsets. This is one of the grounds for the Medical Profession recommending its use for delicate females.

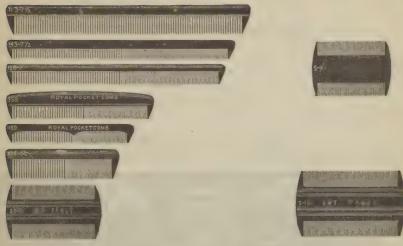

It does not clog, felt, or roll up, as in the ordinary felt, and can be cleansed without fear of shrinking its very durable texture.

# DRUG MILLS.

The Swift Drug Mill has been long and favorably known to the trade, and with the improvements from time to time made, it has kept even pace with the times, but this last places it beyond all competitors.

We hope to be favored with your order for these mills, and believe that you can not fail to be pleased with them, as they are admirably adapted to the wants both of the Wholesale and

Retail Druggists.

We confidently offer these Mills as the very best made. They have stood the test of many years' service in the laboratories of the leading pharmaceutists of the country, and may be relied upon for doing perfect work.

This cut represents the Mill open.

This cut represents the Mill ready for use.

# SWIFT'S NEW "B" DRUG MILL

Is intended to be screwed upon the counter. This mill has many advantages over the others, having great power, is easily adjusted to any degree of fine grinding, and can be opened as shown in the cut, for cleaning, and closed again ready for work, in ten seconds, and without changing the degree of fineness as adjusted; no tools being required. When open, the parts are in the best possible position for dusting out, and any amateur can easily readjust them. The hopper is large, and the can to receive the powder is conveniently arranged.

Dealers as well as others will at once perceive that Swift's "B" Drug mill has peculiar advantages over all others that have yet been presented to their notice. It is quite ornamental, and a handsome counter-fixture. The price is fixed very low, with the hope of large sales.

Price, \$20.

"OLD STYLE."

PRICE.....\$8.00 We have reduced the price of the "Old Style" to \$8.00, at which price it is, considering quality, the cheapest in the market.

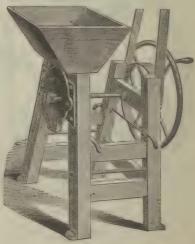

"CHAMPION."

"NEW STYLE."

PRICE.....\$9.00
The "New Style" is fitted with a heavier flywheel, and it is easily taken apart and cleaned.

"POWER."

admitted may be graduated according to the power at command.

Grinding plates \$3.00 a set. Any of these Mills packed in shipping order without extra charge.

.....each, 20 00

No. 16. Price, \$20.

The Mill is very similar to the "B" Mill, with the exception that the grinding-plates are horizontal instead of perpendicular, with the receiver inclosed in a drawer. It is readily adjusted to any degree of fine grinding, as easily cleaned and quite as ornamental and handsome a counter-fixture as the "B" Mill.

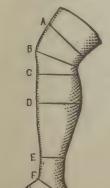

We can recommend it as a very desirable Mill for the use either of the wholesale or retail druggist. Price, \$20.

"Harris"-No. I, 9x12.

## Archibald's Suppository Machine.

FOR MAKING SUPPOSITORIES RAPIDLY BY COLD COMPRESSION.

(PATENTED APRIL 29TH, 1879.)

Suppository Machine.

Machine open, with Mould.

Mould, cut longitudinally.

Manner of discharging Suppository.

Figure I. represents the machine complete, reduced to one fourth the size; A the hopper, in which is thrown the mixture of Cacao Butter with active ingredient; B the plunger, used for compressing the Suppositories; C the hand lever; D the swing bed for holding the mould; E the mould, split longitudinally; G the Suppository in one half of mould after compression; Figure IV. the manner of discharging the moulded Suppository; I the cut-off.

Where 15 grain Suppositories are ordered, the amount of Cacao Butter to be used should be 15 grains, less the amount of medicinal ingredients. The same rule applies to 30 grain suppositories, etc.

Price of Machine, with two sets of Moulds, 15 and 30 grains.....each, 7 00

Madame Lang's Perfected Nurser, with Monchovaut's Suction Attachment.

This Nurser is fitted with a Suction Valve, the patent of H. Monchovaut, Laon (Aisne), France. The stopper has an aperture which allows the air to pass into the bottle, and the exhaust-tube contains a rubber valve. The mouth-piece or nipple is so perforated that the whole constitutes a perfect suction, and allows the child to nurse without the least exertion.

Each put up as the ordinary Madame Lang's Perfected Nurser, complete......doz. 3 25

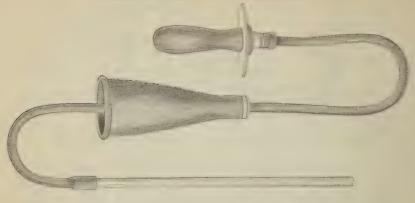

Brighton Nurser.

Windsor Nurser.

#### THE COOPER PATENT PILL MACHINE.

PRICE, \$12.00 EACH.

Brass Plates. Mahogany Board and Drawer.

This machine has two sets of reversible Plates, on which four different sizes of Pills can be made, and the sides of the rolling board are so constructed as to allow the mass to be rolled just the size required for each respective size of Pills, thereby insuring always the full number of perfectly round pills.

**	5.—Silk Bag—Superfine Elastic Waistband and Buttock Straps, with 2 adjusting buckles at abdomen, and 2 Buttock Strap adjusting buckles. Bags of fine English silk netting in white or flesh		
64	color	3 50	20 00
	2 adjusting buckles at abdomen, and 2 Buttock Strap adjust- ing buckles. Bags of fine English or French Silk netting in white or flesh color	5 00	30 00

The Elastic is manufactured expressly for us, and is fresh from the loom every ten days. We warrant it to retain its freshness and elasticity 5 years.

Orders received and promptly executed by the Patentee and Sole Manufacturer. For sale by all first-class druggists.

S. E. C. RAWSON, Saratoga Springs, N. Y.

Dr. Miliano's Contracting and Compressing Suspensories without rubber. These Bandages have been in use for some years, and have the approval of our most eminent physicians, as superseding in an eminent degree the ordinary suspensory, as well as strips of adhesive plaster, where compression is required in the relief or cure of the several swellings, variocele, pain, etc. For full description and further particulars as to their advantage over others, see Circular accompanying each Bandage.

The following pages, 372 to 456, contain Advertisements of various branches of business and specialties, all connected, more or less, with the Drug Trade, and therefore will be found of interest to buyers in this line, especially as they refer to articles possessing merit and in general use. They are therefore commended to the careful perusal of all who receive this book.

OVER LEAF FIND INDEX TO ADVERTISEMENTS.

(Established 1849.)

## HAGERTY BROS. & CO.,

Nos. 3, 5, 8 and 10} OFFICE AND SAMPLE ROOM, No. 10. { Platt St., New York. FACTORY: SMITH ST., NEAR NINTH, BROOKLYN.

MANUFACTURERS, IMPORTERS AND EXPORTERS OF

Every variety of Druggists,' Perfumers,' Confectioners' and Liquor Dealers

# GLASSWARE,

Rubber Goods, Porcelain Ware, and Sundries.

### LETTERED PRESCRIPTION VIALS.

In this department of our manufactures we excel as by our process the LETTERING is brought out CLEAR, BOLD and DISTINCT.

## DRUGGISTS' OUTFITS AND SUPPLIES.

We call the attention of Druggists to our NEW ELASTIC BULB SYRINGE, the NICHOLS No. 1, which for utility, durability, and price is unequalled by any Syringe now in the market. This Syringe has two rubber tubes, inlet and outlet, and three metal tubes, vaginal, rectum, and infant. Price, \$3 00 per dozen, net.

## The Peerless Nurser with Double Valve.

TRADE MARK REGISTERED MARCH 21, 1878.

The shape, purity of materials, the ease and comfort to the child while nursing, the facility with which it can be cleaned, the impossibility of getting out of order, in connection with the use of the DOUBLE VALVE, render this Nurser superior to any other Nursing Bottle ever produced. The Nurser is put up in four different styles, Nos. 1, 2, 3, and 4, very neat and attractive, and at prices not higher than those of ordinary Nursing Bottles.

An Illustrated Catalogue, or Special Quotations, forwarded on application.

## W. H. Schieffelin & Co.'s SOLUBLE PILLS.

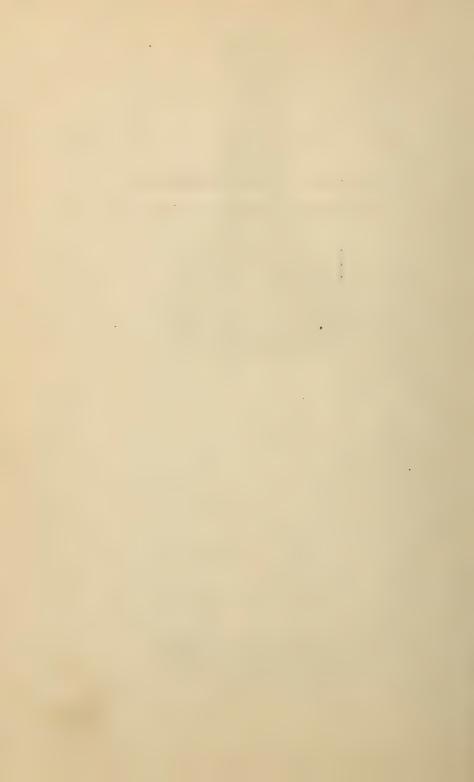

The great increase during the past few years in the demand for Pills made in accordance with the U. S. Pharmacopocia and other recognized formulas, induced us some time since to commence their manufacture in our own Laboratory, and we are now prepared to supply an article that we can guarantee to be made in strict accordance with the standard formulas, both as regards weight and quality, and for beauty of finish, solubility, and general excellence, are unequalled. We therefore beg to call the attention of our customers and the public generally to our Soluble Coated Pills, which are the result of careful experiment and investigation, with a view of producing an article that will combine the requisites of perfect reliability as to the quantity and quality of the material used, with a coating which is soft, transparent, readily soluble, and not affected by change of climate.

For full List and Prices, see Pages 115 to 123.

FAC-SIMILE OF BOTTLE AND LABEL.

This Double Distilled Bay Rum will be found of superior quality, and we can confidently recommend it to all who desire a strictly pure distilled article. It is in bottles containing 25 fluid ounces, and packed in cases containing one dozen each. Price per case, \$10 00.

#### HUSBAND'S CALCINED MAGNESIA

Medal Awarded at the World's Fair, New York, 1853.

First Premium Silver Medals awarded by the Franklin Institute, Philadelphia; by the Mechanic's Association, Boston; by the American Institute, New York; and by the Maryland Institute.

In the report of the twentieth Exhibition of American Manufactures by the Franklin Institute, Pa., it is stated that Husband's Magnesia is "Believed to be the best in the United States."

The following Certificates of some of the most distinguished Professors and Practitioners of Medicine in Philadelphia and elsewhere, will show the character of this preparation. Its super or qualities consist in its being entirely deprived of carbonic acid; in its freedom from unpleasant taste, smell, or other disagreeable property, and without roughness or grittiness to the touch or palate. One teaspoonful of it is equal in strength to three or four teaspoonfuls of the common Calemed Magnesia; thus combining smallness of Lisco with the most agreeable form in which Magnesia can be administered,

I have examined a bottle of the Calcined Magnesia prepared by Thomas J. Husband, and regard it as an excellent article.

Philadelphia, 1844.

Frof. Materia Medica in Jeff. Med. College.

I have made trial of the Calcined Magnesi prepared by Mr. Thomas J. Husband, and consider : quite equal to that of Mr. Henry of Manchester. FRANCIS G. SMITH, M.D. PHILADELPHIA, 1844.

Having had some experience in the u e of Husband's Magnesia with my patients. I feel confidentiat it is fully equal to H nry's English Magnesia; and I think one teaspoonful equal to four teaspoonsful of the common Calcined Magnesia of the shops.

CHARLES NOBLE, M.D. PHILADELPHIA, 1845.

l have great pleasure in recommending the Calcined Magnesia prepared by Mr. Thomas J. Hus d, as a very superior reticle. J. RANDOLPH, M.D. band, as a very superior : rticle.

PHILADELPHIA, 1845.

I take great pleasure in recommending Mr. T. J. Husband's Calcined Magnesia as an exceller preparation, quite equal, I think, to Henry's.

Philadelphia, 1845.

Late Prof. Mat. Med. and Therapeutics in Franklin Med. C !

Having been for sev ral years familiar in my practice with the use of Husband's Calcined Magn sia. I have no hesitation in recommen ing it as a valuable article, equal in every respect to Henry celebrated preparation.

Philadelphia, 1849.

Late Prof. of Institutes of Med. and Med. Juris. in Phila. Col. of Med.

I have used the Magnesia prepared by Mr. T. J. Husband, and consider it in every respect equal to that prepared by the Messrs. Henry of Manchester, W. W. GERHARD, M.D. Physician to Pennsylvania Hospita PHILADELPHIA, 1849.

I have constantly employed Mr. Husband's Magnesia of late years, and believe it to be equal to the second of Manchester.

J. F. MEIGS, M.D. Henry's of Manchester.

PHILADELPHIA, Aug. 20, 1850.

PHILADELPHIA, Aug. 20, 1850.

I take much pleasure in recommending Husband's Calcined Magnesia. I consider it equal in every respect to that prepared by the Messrs. Henry of Manchester.

SAMUEL LEWIS, M.D.

Member Royal Col. Surg. London.

I have used Husband's Magnesia, and have no hesitation in recommending it as quite equal to I have used Husband's Magnesia and have no hesitation in recommending it as quite equal Henry's Magnesia in activity and delicacy.

PHILADELPHIA, 1846.

## ISINGLASS ADHESIVE PLASTER.

Manufactured by THOMAS J. HUSBAND, Philadelphia.

This Plaster has been found to be admirably adapted to Strapping after Surgical operations, and as a dressing to either incised or lacerated wounds. It is cleanly, of easy applican in, adheres firmly without their having to be disturbed by its removal, until, in many instances, the cure is effected. This Plaster is not

affected by age, and will bear exposure to any climate.

Professor MUTTER, in his late edition of Professor Liston's Lectures on Surgery, etc., remarks that "the Isinglass Plaster referred to by Mr. Liston, is exceedingly well made by Mr. Husband of this city; and for some time past I have almost abandoned the use of the old Adhesive Plaster of the shops, which often in persons of a delicate skin, or children, produces troublesome irritation."

The following Testimonials from some of the most distinguished Surgeons in the United States, will

show the estimation in which it is held by the Profession:-

I consider the Isinglass Plaster prepared by Mr. Husband a very valuable article for many surgical purposes, and think it ought to be introduced into general practice. W. GIBSON, M. D. Philadelphia, February 15, 1844. Prof. of Surgery, etc., in the University of Penasylvania.

I have used the Isinglass Plaster prepared by Mr. T. J. Husband, and find it an excellent article. It is therefore with much pleasure that I recommend it to the Profession. THOS. D. MUTTER. Philadelphia, March 13, 1844.

Professor of Surgery, etc., in Jefferson Med. Col.

PHILADELPHIA, March 13, 1844.

I have repeatedly employed the Isinglass Plaster made by Thomas J. Husband, as a dressing after operations, and can recommend it to the favor of the Profession as a neat and unirritating application, and can recommend by the favor of the common adhesive plaster.

J. PANCOAST. and, in many instances, an excellent substitute for the common adhesive plaster. J. PANCOAST.

Philadelphia, May 13, 1844.

Professor of Anatomy in Jefferson Medical College

# "NATRONA" BI-CARB. SODA.

### "THE BEST IN THE WORLD."

(Absolutely Pure.)

The nature of the raw material from which Natrona Bicarbonate of Soda is made—viz., cryolite, a mineral containing pure sodium—insures a purity and uniformity of product which cannot be obtained from any other known material. In making Bicarb. Soda from any other raw material, the use of sulphuric acid is a necessity, but none is used in any part of the process of making Natrona Bicarb.; hence its entire freedom from the slightest trace of arsenic, which is always present in ordinary soda. Its absolutely purity and entire freedom from all traces of sulphate of soda, common salt, and other impurities, render Natrona Bicarb. Nearly tasteless, and being bolted through the finest bolting-cloth insures the finest state of division.

To these indisputable facts the attention of CONSUMERS of soda is specially called. They are IMPORTANT, and should influence both those who use and those who sell soda to buy and sell NONE BUT THE BEST.

The NATRONA Bicarb. Soda, having supplanted the English Bicarb. in the American markets, is kept in stock by almost every wholesale Druggist and Grocer throughout the United States, of whom it may be ordered.

NATRONA BICARB. SODA is unequalled by any other brand of ENGLISH or AMERICAN manufacture.

## GARDNER'S CHEMICALLY PURE HYPOPHOSPHITE PREPARATIONS.

THESE preparations contain Chrmically Pure Salts in a neutral condition.

These preparations contain Chemically Pure Salts in a neutral condition.

No single combination of Hypophusphites being adapted to the varying requirements of disease, each salt is represented in a preparation by itself, so that the particular salt indicated can be used in proportions to suit the case treated.

The importance of this arrangement is apparent when it is considered that in Phthisis, for stance, the best authorities agree that the Soda and the Lime salt are each separately indication different stages of the disease; the Soda being adapted to the treatment of the primary stag, while the Lime is indicated in the second and third stages only; the Potassa salt, because a state of the disease of the disease; the Soda being adapted to the treatment of the primary stag, while the Lime is indicated in the second and third stages only; the Potassa salt, because a stage of the disease of the second with the matured views of the best authorities, based upon hong and watchful citized experience in hospital practice. The Hypophosphite of Quinia is valuable in certain condition of Phthisis, either to combat malarial complications, to assist in arresting night sweats, or to aid, I its tonic action, the excessive debility caused by the disease.

Dr. Churchill does not prescribe the Hypophosphites of Lime and Soda combined, but uses the Soda or the Lime salt separately as indicated, and wherever indications point to the use of both he alternates, giving first one, and then the other, thus keeping the patient under the separate action of both.

The combination of Lime, Soda, Iron, and Potassa is very valuable as a general and nervor, tonic, when no phthisical complications exist.

Hypophosphite of Iron is frequently indicated in Phthisis, but is recommended to be given whe required, by itself, in leu of the dose of either the Soda or the Lime salt; this salt is particularly useful in Dysmenorrhea, Anzemia, and Chlorosis.

The experience of the past six years in the use of these preparations of chemically pure Hypoph the Physician is left no discretion of judgment in the selection of the salts best adapted to the condition of his patient.

For the information of those of the Medical Profession who are unacquainted with these preparations, the subscriber would state that they are put up in a strictly legitimate manner, in thirtee-fluid ounce, round bottles only, the label giving the name and exact proportion of the salt or salt represented. They are advertised solely and only to the medical profession.

A little pamphlet denominated "Phosphorus, Iodine, and Iron; Notes upon the Best Means of Effecting their Assimilation," will be cheerfully mailed without charge upon application.

#### Prepared by ROBERT W. GARDNER.

Pharmaceutical Chemist, New York.

W. H. Schieffelin & Co., New York, Sole Wholesale Agents.

### NON-IRRITANT IODINE

#### FOR INTERNAL USE.

A Valuable Improvement in Pharmacy: Gardner's Unalterable Syrup of Hydriodic Acid.

In this preparation the Hydriodic Acid is perfectly protected against decomposition, and is therefore always available for medical use—a result never before attained.

Hydriodic Acid was formerly officinal, but always decomposed within a few hours after its preparation, and was therefore rarely, if ever, in a fit condition for internal administration.

The decomposition is caused by the disengagement of Hydrogen; this sets free its equivalent of Iodine, which colors the remaining Acid red, and renders it too irritant for internal medication.

Simple mixtures of Hydriodic Acid and Syrup do not keep.

When not decomposed, Hydriodic Acid is of a light-yellowish color, is perfectly non-irritant, gratefully acid to the taste, and rendered still more acceptable if combined, as in this preparation, with sugar.

In chemical composition it consists of one equivalent each of Iodine and Hydrogen—(HI). As the equivalent of Iodine is 127, and that of Hydrogen I, it follows that the proportion of Hydrogen present as compared to Iodine is less than one per cent (78-100 of 1 per cent). The Acid is therefore nearly pure Iodine.

It affords the most natural and effective means of assimilating Iodine, as the Hydrogen with which it is combined is one of the largest elementary constituents of the body. The combination renders Iodine more assimilable, therefore, because in psychological harmony, while it is medicinally mere active, and deprived of its objectionable irritant properties, and changed from a most disagreeable to one of the pleasantest of remedics.

This Syrup has been remarkably useful in Asthma. Chronic Bronchitis, and Hay Fever. See papers by J. P. Oliver, M.D., Botton, "Med. and Surg. Journal," March 4, 1580, and by W. Gill Wylie, M.D., New York, "Medical Record," May 10, 1879.) While it is as been found specially useful in these Diseases, it is applicable to all that large class of affections where the assimilation of Iodine is indicated, as in chronic and subacute catarrhal affections, Goitre, Adipose, Tumors, Syphilis, etc., also in chronic Malarial Po soning, and porticularly in Asthma. (Also in Acute Rheuma ism.) See "N. Y. Med. Record," April 21, 1883, p. 448.

Its effect upon mucous surfaces is more marked than with other forms of Iodine, while it is effective in smaller relative proportions.

It is as palatable as Lemon Syrup.

It is so free from irritant action that it may be given to the youngest infant,

Its efficacy in Syphilis has been demonstrated.

One ounce of this Syrup contains forty minims of dilute Hydriodic Acid, representing 6.66 grains of Iodine, which corresponds to 8.69 grains of Iodide of Potassium; it is, however, more active than Iodide of Potassium, and should be given in smaller relative doses.

The Dose of this Syrup is from one to three teaspoonfuls in twice the bulk of water, three or four times a day.

## Prepared by ROBERT W. GARDNER, Pharmaceutical Chemist, 170 William Street, New York.

W. II. Schieffelin & Co., New York, Sole Wholesale Agents.

FOR SALE BY PHARMACEUTISTS GENERALLY.

NOTE.—Physicians desiring to prescribe this preparation will please specify "Gardner's," as imitations of it have been used in a decomposed state with serious results, disappointing the anticipation of the physicians and creating undeserved prejudice against this remedy.

## I CATECHU

Patented Nov. 26, 1878, by WELLS, RICHARDSON & Co., Burlington, Vt.

By an improved process the Catechu is freed from the many impurities so abundant in the crude article, and it is thereby made much stronger and better for all uses. It enables the dealer to supply a better article to the consumer, and, at the same time, save the loss from waste and shrinkage of weight, which is always large when Catechu is handled in bulk. It will save a great deal of time and temper, which are quite sure to be lost when retailing the crude article.

CAUTION.—Dealers are cautioned against se'ling any Catechu in packages that is not put up by us. Our patent covers both the refining and the putting in packages. All infringements will be prosecuted.

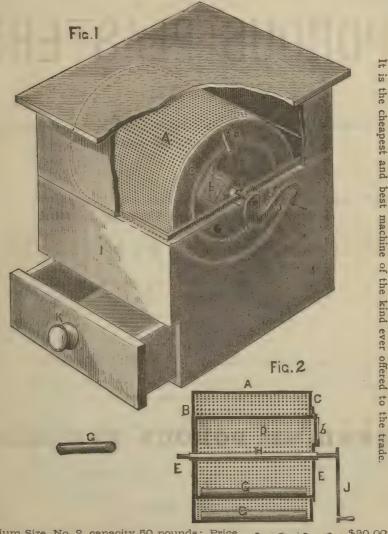

In pound packages, per pound, 13 cents. In half-poun! packages, per pound, 14 cents. In fourth-pound packages, per pound, 16 cents.

### MCINTOSH GALVANIC & FARADIC BATTERY CO.,

MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,
Table, Office and Family Batteries, Electrodes,
Electric Bath Apparatus, Statical Electric Machines,
Stereopticons, Solar, Monocular and Binocular
Microscopes.

We would call the Special Attention of the Medical Profession to our

COMBINED
GALVANIC AND FARADIC BATTERIES.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government, for use in the Medical department of the Army and Navy.

THEY ARE THE FIRST AND ONLY PORTABLE BATTERIES EVER INVENTED WHICH GIVE BOTH THE GALVANIC AND FARADIC CURRENT.

TWO DISTINCT BATTERIES IN

ONE CASE.

### NO PHYSICIAN CAN AFFORD TO BE WITHOUT ONE.

This Celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied and cleaned as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid can not spill or run between the cells, and there is no danger of breaking as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra large cell (with a zinc and carbon element) is added to the combined batteries for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvaric cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity than any other

battery manufactured.

Our Illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

M°INTOSH GALVANIC & FARADIC BATTERY COMPANY, 192 & 194 Jackson St., CHICAGO, ILL.

## DR. McINTOSH'S NATURAL UTERINE SUPPORTER.

No Instrument has ever been placed before the Medical Profession which has given such Universal Satisfaction.

EVERY INDICATION OF UTERINE DISPLACEMENTS is met by this combination; Prolapsus, Anteversion, Retroversion and Flexions are evercome by this instrument, when others fail. This is proven by the fact that since its introduction to the Profession it has come into more general use than all other instruments combined.

UNION OF EXTERNAL AND INTERNAL SUPPORT.—The abdomen is held up by the broad moroeco leather belt with concave front and elastic straps to buckle around the hips. The Uterine Support is a crip and stem made of highly polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

ADAPTABILITY TO VARYING POSITIONS OF THE BODY.—The cup and stem are suspended from the belt by two soft elastic Rubber Tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

SELF ADJUSTING.—One of the many reasons which recommend this Supporter to the Physician is that it is self adjusting. The Physician after applying it need have no fear that he will be called in haste to remove or readjust it, (as is often the case with rings and various pessaries held in position by pressure against the vaginal wall,) as the patient can remove it at will, and replace it without assistance.

It can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or any Flexion of the womb, and is used by the leading Physicians with unfailing success, even in the most difficult cases.

Our Reduced Prices are, to Physicians, 6.00; to Patients, 10.00.

Instruments sent by mail at our risk, on receipt of price; or we can send by express, C. O. D., and collect return express on the money.

CAUTION.—We call particular attention of Physicians to the fact, that unscrupulous parties are manufacturing a worthless imitation of this Supporter, and some dishonest dealers, for the sake of gain are trying to self them, knowing they are decelving both Physician and pattent

PERSONS RECEIVING A SUPPORTER WIll find, if it is genuine, the directions pasted in the cover of the box, with the head-line "DR. L. D. #### TWENTY-SEVENTH YEAR.

## THE DRUGGISTS CIRCULAR

#### AND CHEMICAL GAZETTE.

This widely-known and popular publication is issued monthly from 36 Beekman Street, New York, at the low price per annum (including postage) of

#### ONE DOLLAR AND SIXTY CENTS.

To keep abreast of the times every Druggist should subscribe for at least one good Pharmaceutical Periodical: if he cannot, for want of time, regularly read it, he will nevertheless find it valuable for

reference in time of need.

The Druggists Circular is, we believe, the paper that will meet the requirements of the case. It contains the cream of Foreign and American Pharmaceutical literature, including the whole sphere of Laboratory and Counter Pharmacy; in tall new medicines, so soon as known, are fully noticed, their ascertained properties described, and their pharmaceutical management, therapeutical uses, doses, modes of administration, and physiological effects carefully reported.

One of the most useful features of the Dreggists Circular is the familiar discussion in each number, under "Notes and Queries," of some of the many practical difficulties which beset both the Physician and the Apothecary in their professional dealings with patients and daily counter of business; under this head also much will be found relating to incompatibles in prescriptions, and the best forms for the prepara-

tion and administration of puzzling combinations, such as physicians are daily prescribing.

The Demography Circular contains a monthly Review of the Drug Market, and a COMPLETE PRICE-CURRENT, embracing nearly every medicinal article of a well-stocked Drug Store, with prices each month carefully corrected by one whose opportunity and pursuits fully fit him for the undertaking. It gives always as fair and rational an idea of market values as it is possible in any list of prices to attain.

It will not be out of place here to add to the foregoing statements a few of the many letters daily reaching us from subscribers, which testify to the satisfactory character of the publication:

"Though long out of the Drug Trade I read the CIRCULAR with as much pleasure as a newspaper, and look for it at the beginning of each month with as much interest."—J. W. C. O'NEAL, Gettysburg, Pa.

"Every number of the CIRCULAR is well worth the entire price of subscription."—CHAS. H. A. STAFFORD, Middlebury, Vt.

"We might say that we are pleased and instructed by the monthly visits of the DRUGGISTS CIRCULAR, and consider it the best medical journal we take."—A. M. HERRING, British Columbia.

"I have been a constant subscriber to the CIRCULAR for 12 years, and each year marks a visible improvement in all its departments. It is certainly a godsend to any young druggist, and to us older ones it seems each month like meeting an old friend. Go on in the good work."—N. I. FORD, Oneonta, N. Y.

"The CIRCULAR is indispensable to us, and well worth several times the subscription to any Druggist for the valuable formulas which it contains."—J. A. JACKSON, Gardiner, Me.

"I have found the Druggists Circular a great source of help to me, and hope the number of 1881 will be as satisfactory as the past year."—G. A. LEMMON, Woodbury, Conn.

"The Druggists Circular is, in my estimation, the best paper of the kind published, and I never want to be without it."—G. F. WAGNER, Jr., Rock Island, Ill.

"I can't get along without my Druggists Circular. If I had to give up one or the other, I would give up the U.S. Dispensatory before I would the Circular." EDW'D C. JACKSON, Norfolk, Va.

"You may rely on my taking the CIRCULAR next year, and I hope to get another subscriber. I think the paper well worth double the money. I have taken it three years and can highly recommend it to English chemists."—J. W. ADAMS, Salford, England.

"My name has been on your books for the past nine years, and the ninety-six uumbers of the first eight years, which I have bound in four volumes, I consider the most valuable part of my permanent business and professional library."—A. T. WILLIAMS, New Hamburgh, N. Y.

"I have got so now that I can't get along very well without the DRUGGISTS CIRCULAR. I find lots of good information that I benefit by. I am having a lot bound for future reference."—C. H. KIRKWOOD, Ishpeming, Mich.

"We fully appreciate your efforts to furnish Druggists with some reliable journal for their especial use, We hardly think that we could do without it. Every number is full of practical thoughts, practical formulas, and scientific essays."—LYON & COMPANY, Spring Valley, O.

"I have saved several times the cost the last year, and do not intend to do without the CIRCULAR as long as I continue in the Drug Business."—L. H. CLAPP, Lebanon, Va.

A Specimen Copy will be sent on application.

JOHN NEWTON. Editor and Proprietor.

New York. 36 Beekman Street. P. O. Box 3621.

Put up in 1, 5, 10, 25, 50, and 100-lb, cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ  $C_{10}H_{30}$  and  $C_{10}H_{30}$ . It contains but a small percentage of the paraffines and olefines corresponding to the formulæ  $C_{11}H_{30}$  and  $C_{12}H_{34}$ , respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel

result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

(osmoline (Unquentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (320° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880. Messrs, E. F. Houghton & Co.-I have for a number of years made extensive us: of Cosmoline (Unguentum Petrolci), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other latty matter, especially by reason of its non-liability to change by time or temperature. JOHN H. PACKARD, M.D. Yours truly,

Messrs. E. F. Houghton & Co.—I have used extensively Cosmoline. Unguentum Petiolei both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases.

Yours truly, JOHN V. SHOEMAKER, A.M. M.D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK. Messrs. E. F. HOUGHTON & Co.—Gents: I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urchral sounds. It is the cleanest oil I know of for this purpose. Yours truly, GEO. HENRY FOX.

## "ELGIN'S PHANTOM TOILET POWDER."

Placed upon the market twelve years ago, without the aid of extensive advertising, and solely upon its own merits, the sales of this Great London Beautifier have steadily increased, until now it is known and appreciated by the ladies in nearly every section of this country. Endorsed as it has been by the élite of the world, dealers may place it in stock as one of the Standard Face Powders of the Day.

Its beautifying effects are really wonderful. In this particular it stands far ahead of all rival preparations. It is put up in neat paper boxes, with fine steel engraved labels. It is harmless to the skin, and adheres splendidly. For every day use it is a favorite, but for the opera, evening parties, and for all extra occasions it will be specially esteemed on account of the surpassing brilliancy and beauty it gives to the complexion.

Send in a trial order. You can well afford to stock up with this justly celebrated Face Powder. Price, \$1.75 per dozen; Large size, \$3.50.

### THE ONLY PERFECT SUBSTITUTE FOR MOTHERS' MILK.

As a nourishing, strengthening, milk-producing diet for Nursing Mothers, Mellin's Food has no equal. Invalids find it a most satisfactory and nourishing article of diet.

Its

method of preparation adapts it to the most delicate stomach.

MELLIN'S FOOD is not Farinaceous. MELLIN'S FOOD is entirely Soluble.

> MELLIN'S FOOD is rich in bone and teeth-making elements. MELLIN'S FOOD requires no cooking.

MELLIN'S FOOD keeps in all climates.

MELLIN'S FOOD is fully described and explained in a little work on "Infant's Food," of which we have recently published a new edition. It will be sent free by mail to any address on application.

Commended by the Best Physicians, and Sold by Druggists Everywhere.

Are pleased to furnish samples of our various manufactures to all applicants.

FOR SALE BY W. H. SCHIEFFELIN & CO.

### MÖLLER'S

### PUREST NORWEGIAN

## COD-LIVER OIL.

TRADE-MARK.

It is now about twelve years since we accepted the sole agency for North America for this article; we did so only after a very careful examination of the facts connected with its manufacture, as we had reason to believe that a large proportion of the Cod-Liver Oil which is sold is prepared in so careless a manner as to render it unfit for use.

Immediately upon its introduction into this country it took front rank as a pure and strictly reliable article, and we feel warranted in claiming it to be, beyond any question, the best and most reliable Cod-Liver Oil in the world.

In view, therefore, of what we know of the article itself, and of the numberless testimonials it has received, we can with confidence recommend it to physicians, druggists, and consumers.

- In FRANCE, the ONLY GOLD MEDAL at the International Exhibition in Paris, 1878.

The great reputation Möller's Cod Liver Oil has now enjoyed for so many years, is solely due to its genuineness and the mode of preparation, originally devised and introduced by Peter Moller, which produces a natural Oil, without any refinement whatever, as sweet and pure as the finest Olive Oil.

a natural Oil, without any refinement whatever, as sweet and pure as the finest Olive Oil.

It is in no sense of the word a REFINED article; it is genuine Oil Morritues, pure and fresh as it existed in the hepatic cells of the living fish, and, therefore, endowed with that important quality which alone could constitute its proven superiority over all other varieties.

We desire to call special attention to the following points:

It is bottled at the place of manufacture.

It possesses a sweet and even agreeable taste.

Its administration always followed by satisfactory results.

It does not contain any products of decomposition.

More easily assimilated than other Oils.

More nutritious than other Oils.

Perfect Digestibility.

Perfect Limpidity.

Prepared exclusively from the fresh and healthy livers of the Lofoten Cod.

Purity, Delicacy of Taste and Smell.

From an overwhelming mass of medical evidence, a few testimonials have been selected, coming as they do from those countries in which Cod-Liver Oil in all its varieties is best known, and given as they are by the very highest authorities on the subject, residing in immediate proximity to the well-known localities where, practically speaking, all the Cod-Liver Oil brought into the different markets is produced.

### W. H. Schieffelin & Co.,

### PETER MÖLLER'S

(KNIGHT OF THE ORDERS OF VASA AND ST. OLAF)

### Purest Norwegian Cod-Liver Oil.

As it has been decided by the most competent authorities that the Norwegian Oil is the most valuable as a therapeutic agent, is more easily assimilated, and therefore more nutritious, it may be well to consider some of the objections to the use of the Newfoundland Oil. The Newfoundland fishery is principally carried on by large vessels, which are compelled by the nature of the coast to stand off the shore for many days, and the livers are consequently left untouched until decomposition has commenced; whereas, in Lofoten (Norway), the result of each day's fishing is carried to shore, and can be immediately treated for the oil. But this is not the only objection: the oil prepared from the Newfoundland cod lacks many of the essentials of cod-liver oil as an aliment and curative agent; and again, the shores of Newfoundland abound with the Mallotus Arcticus, or Capelin, which emits a powerful and most offensive odor, and imparts to oil yielded by the livers of fish that have been preying upon it a feetid smell and sickly, nauseous taste, intolerable to many patients. Some authors pretend that the Lofoten cod have no fixed abode, but are continually crossing the Atlantic between the coasts of Norway and Newfoundland, visiting Iceland on their migratory passage; but the latest researches of M. Sars, made on the spot, lend no support to this opinion; on the contravy, it would seem that the numerous banks lying off the coast are the localities selected by the cod when they leave Lofoten. The result of these valuable researches is of great importance when inquiring into the preparation and sources of Cod-Liver Oil, for they show beyond dispute that the Lofoten fish are a peculiar species, nowise related to the varieties that frequent the fjords of Söndmöre and Finmark; nor have they any connection with those immense shoals that visit the coasts of Iceland and Newfoundland. Hence it would appear that the Lofoten Oil is essentially distinct from all other kinds, more especially in its remedial action; and it is quite certa

The pale oil prepared by PETER MÖLLER is in no sense of the word a refined article; it is genuine Ol Morrhuee, pure and fresh as it existed in the hepatic cells of the living fish, and, therefore, endowed with that important quality which alone could constitute its proven superiority over all other varieties, viz.: perfect digestibility, together with a sweet and even agreeable taste, and, as a natural consequence an efficacy peculiar to itself. The following is a brief description of the mode of preparing Möller's Norwegian Cod-Liver Oil:

So soon as the fish have been landed the livers are taken out and submitted to treatment—a few hours being sufficient to affect the purity of the oil. All poor, small, bruised and diseased livers are thrown aside, and those selected (all of large size) are carefully cleansed, by washing in several waters, from blood, membrane and other impurities. The livers are then introduced into a machine which minces them into very small pieces, or, rather, reduces them to a soft, pulpous mass. This pulp is transferred to an apparatus, heated externally by steam, and the mass gradually warmed up to 100° or 102° Fahr. As fast as the oil exudes it is drawn off and filtered. Filtration completes the process. The fresher the livers and the lower the temperature the purer and sweeter in taste will be the oil, whilst the color will be a pale yet brilliant yellow, possessing in a remarkable degree the power of reflecting light.

THE FOLLOWING ARE EXTRACTS FROM SOME OF THE

#### TESTIMONIALS RECEIVED FROM EMINENT MEDICAL MEN.

LOUIS A. SAYRE, M.D., Professor of Orthopedic Surgery, New York. New York Academy of Medicine: Meeting October 7th, 1889. Dr. Sayre spoke of the extreme difficulty of getting any Cod-Liver Oil that patients could digest. Of late years it had become almost impossible. . . . But he had two years since found an oil prepared by Moller, of Christiania, Norway, which was PERFECTLY FURE, and in every respect all that could be wished.

Mesers, W. H. Schieffelin & Co.: For some years I had given up the use of Cod-Liver Oil altogether, but since my attention was called by Dr. Sayre to your Peter Moller's Cod-Liver Oil, I have prescribed it almost daily, and have every reason to be perfectly satisfied with it.

J. MARION SIMS, M.D.

H. B. Sands, M.D., New York, says: "I think it greatly superior to the oil commonly used."

John C. Thorrowood, M.D., Member College Physicians, Assistant Physician to the City of London Hospital for Diseases of the Chest, Victoria Park, says: "I feel it my duty to state that those who have taken it have done so with great comfort and ease, and, further, with much refiel to their symptoms. Mr. Moller's Cod-Liver Oil appears to me to be a thoroughly trustworthy and pure oil, and possesses marked curative properties in consumption."

ABBOTTS SMITH, M.D., M.R.C.P., late physician to the North London Consumption Hospital, says of it: "Owing to the manner in which it is prepared, it does not contain any products of decomposition, and it is therefore less objectionable to the taste and smell and better borne by the stomach than other varieties of Cod-Liver Oil. . . . It is more easily assimilated, and is productive of more immediate benefit than the other kinds of oil are."

Extract from Dr. Ruddock's, M.D., L.R.C.P., M.R.C.S., Report on Cod-Liver Oil in his "Vade Mecum," Part IV.: "The Oil we invariably recommend, for its easy assimilation, agreeableness and high nutritive value, is Moller's Purest Norwegian Cod-Liver Oil. . . We are glad to be able to give our emphatic recommendation to so pure a preparation as the one above named."

There oil. . . . We are glad to be able to give our emphatic recommendation to so purs a preparation as the one above named.'

Itiver oil. . . . We are glad to be able to give our emphatic recommendation to so purs a preparation as the one above named.'

Professor W. Borck, M.D., of Christiania, writes Peter Moller: "I am pleased to hear you have established an agency in London for your Cod-Liver oil. . . I took the opportunity of recommending it to many of my professional friends there as the bast adapted for medical use, knowing that you are always present at Lofoten during the cod-fishing season for the purpose of superintending the preparation of the oil from mose but fresh livers."

FAC-SIMILE OF BOTTLE AND LABEL

## LUCCA "CREAM" SALAD OIL.

This new article of commerce was introduced into the American market, from Tuscany, in the Spring of 1872, after a permanent arrangement had been entered into, through our friends, for its manufacture and bottling at Leghorn.

The sale of this Oil has been a success; it having met with the decided approbation of caterers, hotel-proprietors, restaurant-keepers, and families, for the preparation of Salads, Dressings, etc.

From long experience in the sale of bottled Salad Oils, we are led to consider this article as of the very best character, and worthy of the attention of all parties requiring the very finest quality of *Pure Olive Salad Oil*.

This Oil is put up in bottles of four different sizes.

We also offer a fine quality of Bordeaux Olive Oil, which will be found equal, if not superior, to most of the brands for sale in our market. The brand is "Huile d'Olive Vierge d'Aix." It is put up in bottles of three different sizes:

### J. FEHR'S

NEW JERSEY.

THE HYGIENIC DERMAL POWDER FOR INFANTS AND ADULTS.

During a lifetime of ardent pharmaceutical experience, the writer, with several of his Medical friends, has often felt the great want of a Dermal preparation, which in reality would be agreeable and pleasant to the consumer and at the same time of some therapeutic value.

This impulse led the writer to persistent researches in the Pharmaceutic Realm, until after years of exhaustive scrutiny and thinking, his arduous pains were finally rewarded by discovering the therapeutic value of MAGNESIA SILICATA (4 MgO, 5 SiO<sub>2</sub>+<sup>3</sup>/<sub>4</sub> HO) TALCUM, the Steatite of Theophrastus, who, as far back as 2,100 years ago, in his ven-

erable work on Stones, described it. Talcum, though well known all this enormous time, has all this long time, strange to say, entirely been overlooked by Therapeutists and never been used by Dermatologists. It was at once manifest to the writer that the therapeutic value of the Talcum must be greatly augmented by the addition of an antiseptic and antizymotic agent. This led to the production of the COMPOUND TALCUM, which will celebrate its tenth anniversary this year. In that time the COMPOUND TALCUM has been exhibited for several years at the annual meetings of the American Pharmaceutical Association, and has, in fact, always, every time, on account of its indisputable value as a hygienic and therapeutic agent, created there an unprecedented stir and commotion among the "great men" the "autocratic leaders," the "great men," the "autocratic leaders,"
sages" of that scientific body.

Further, the COMPOUND TALCUM has been exhibited, certainly on account of its merits. at the last meeting of the American Medical Association in the city of New York, and has reaped there and afterward all acknowledgments which could be desired.

The several labels and circulars which belong to the COMPOUND TALCUM are written with the greatest care as to plainness and explicitness, so that they can be easily understood by every Pharmacist and every Physician by a careful perusal.

The manufacturer therefore, scorning the idea of presenting testimonials and acknowledgements of eminent men, deems every pharmacist and every physician well able to comprehend for themselves the real value of this unique preparation. For samples and circulars apply to the manufacturer,

FEHR, M. D.,

(Ancient Pharmacist.)

### SWAIM'S PANACEA,

### FOR THE CURE OF SCROFULA, OR KING'S EVIL,

RHEUMATISM, ULCEROUS SORES,

White Swellings, Diseases of the Liver and Skin, General Debility, etc.,
AND ALL DISEASES ARISING FROM

#### IMPURITY OF THE BLOOD.

THIS Medicine has the singular fortune—a just tribute to its great merit—of being recommended by the most celebrated practitioners of medicine in the United States and Europe; whereas, not one of the spurious mixtures made in imitation of it has the least support from the Medical Faculty. This fact offers an argument so plain and conclusive, that it need only be mentioned to enforce conviction.

#### FROM DR. SAMUEL R. MARSHALL,

Surgeon of the United States Naval Hospital, New York, etc.

I have used Mr. Swaim's Panacea in several cases of secondary syphilis and mercurial disease, which were sent to the Naval Hospital at Brooklyn, and feel pleased to say, with complete success in every case. SAMUEL R. MARSHALL, M.D.

#### FROM DR. VALENTINE MOTT,

Professor of Surgery in the University of New York, Surgeon of the New York Hospital, etc.

I have repeatedly used SWAIM'S PANACEA, both in the Hospital and in private practice, and have always found it to be a valuable medicine in chronic syphilitic and scrofulous complaints, and in obstinate cutaneous affections.

VALENTINE MOTT, M.D.

#### FROM DR. W. GIBSON,

Professor of Surgery in the University of Pennsylvania, Surgeon and Clinical Lecturer to the Almshouse Infirmary, etc.

I have employed the PANACEA of Mr. Swaim in numerous instances within the last three years, and have always found it extremely efficacious, especially in secondary syphilis and in mercurial disease. I have no hesitation in pronouncing it a medicine of inestimable value.

W. GIBSON, M.D.

#### FROM DR. N. CHAPMAN,

Professor of the Institutes and Practice of Physic and Clinical Practice in the University of Pennsylvania, President of the Academy of Medicine of Philadelphia, etc.

I have, within the last two years, had an opportunity of seeing several cases of very inveterate ulcers, which, having resisted previously the regular modes of treatment, were healed by the use of Mr. SWAIM'S PANACEA; and I do believe, from what I have seen, that it will prove an important remedy in scrofulous, venereal, and mercurial diseases.

N. CHAPMAN, M.D.

#### FROM DR. WILLIAM P. DEWEES,

Professor of Midwifery in the University of Pennsylvania, Member of the American Philosophical Society, and of the Philadelphia Medical Society, etc.

I have much pleasure in saving I have witnessed the most decided and happy effects, in several instances of inveterate disease, from Mr. SWAIM'S PANACEA, where other remedies have failed; one was that of Mrs. Brown. WM. P. DEWEES, M.D.

THE

## A. & H. "TASTELESS" CASTOR OIL.

(Oleum Ricini Insipidum, A. & H.)

PURE, ACTIVE, ABSOLUTELY FREE FROM ODOR AND UNPLEASANT TASTE.

The A. & H. Castor Oil will, we believe, be found free from the only drawback that has hitherto attended the use of, perhaps, the safest, surest, and most generally

valuable aperient known.

It is prepared from the entire seed, and the process employed yields a perfectly pure Castor Oil, possessing the well known properties of the remedy, but entirely free from the nauseous smell and taste, a result never before attained. The activity of this oil is in no degree reduced by the new method of manufacture. It is equal in this respect to the best East Indian Oil, and Superior to the Italian, hitherto preferred as the least repulsive variety, and often sold as "tasteless."

The LANCET, March 4, 1882, writes: "Messrs. Allen and Hanburys have recently introduced a variety Castor Oil which seems likely to supersede the old-fashioned form with which we are all so familiar. Their 'tasteless Castor Oil is absolutely pure, is almost colorless, and is as free from disagreeable taste or suell as anything of the nature of oil can be. We have given it an extressive trial, and find that it is taken but he shipless adults without the shipless diffusity which it is aperion, effects are unquestionable. It both by children and adults without the slightest difficulty, whilst its aperient effects are unquestionable. It possesses all the advantages that are claimed for it

possesses all the advantages that are claimed for it."

The BRITISH MEDICAL JOURNAL, Jan. 28, 1882, writes: "Although absolutely pure Castor Oil, it is so prepared as to be entirely devoid of smell, and to have none of the disagreeable flavor which characterises the ordinary varieties of this oil. It possesses full aperient properties."

The MEDICAL TIMES AND GAZETTE, Jan. 7, 1882, writes: "Messes, Allen and Hamburys have introduced. a Castor Oil that is absolutely free from taste and smell, and have thereby earned the gratitude of countless multitudes of persons of all ages. That the oil is Castor Oil is proved by its remaining physical and its medicinal properties, but it is as free from smell and taste as olive oil. It is therefore taken very much more readily; it does not produce nausea or after-taste; and, withal, it retains the full aperient properties of ordinary pure Castor Oil."

The MEDICAL PRESSS AND CIRCULAR March to 1882 writes: "We have had the

The MEDICAL PRESS AND CIRCULAR, March 15, 1882, writes: "We have had the opportunity of employing this 'tasteless' Castor Oil of Alen and Hanburys' in a public hospital, on a large scale. Its aperient power is complete, and it is fully appreciated by the patients, especially by children, who, finding it quite tasteless, never raise an objection to its administration."

The PRACTITIONER, March, 1882, writers: "The combined blandness and efficiency of Castor Oil make it one of the most valuable remedies of the Pharmacopocia, but its abominable taste renders it little less than an instrument of torture to many persons, especially to children. Messrs. Allen and Hanburys have succeeded in producing an oil which is entirely free both from taste and smell, and which, by the tongue or nose, can hardly be distinguished from pure salad oil. The introduction of such a valuable medicine, deprived of its disagreeable qualities, is, we think, a very great boon."

#### DIRECTIONS FOR USE.

The best way of taking the A. & H. Castor Oil is thoroughly to mix the dose with about four times as much HOT Milk, this is most effectually accomplished by shaking the two together in a bottle which they do not more than half fill. The mixture should then be taken IMMEDIATELY. The oil may also be taken floating on Coffee, Lemon-juice, or Peppermint water, or in any of the ordinary ways, but when taken as above directed its activity appears to be increased, and being rendered very limpid by the hot milk, its oily nature is not perceived. Children take it very readily in this form, in which, indeed, it is scarcely distinguishable from rich milk.

DOSES.—For an adult, one tablespoonful: for a child, one teaspoonful; but with some constitutions more is necessary.

Sold only in bottles bearing ALLEN & HANBURYS' Signature and Trade Mark.

NOTICE.-The above is an entirely new article, and, if not in stock, can be readily procured by any Druggist.

## LICORICE

Filling all the requirements of the U.S. Pharmacopaia.

We call the attention of all consumers of Licorice to our now well established brand of this article. We invite critical comparison with the most celebrated of the foreign brands as regards appearance, fracture, flavor, freedom from gritty or other impurities. We give the buyer actual net weight in his purchases, which alone is a saving to him of fully ten per cent, besides the price, which is twenty per cent less than any of the genuine foreign brands.

Prejudice based on ignorance should no longer delude buyers of Licorice to stand in their own light by still selling foreign manufactures, when we offer a better article at a lower price, in wholesale quantities, while the retail price is the same as the high priced foreign brands, thus affording the retail dealer a very much larger profit on every pound he sells, besides giving his customer better satisfaction.

The sizes are 4, 6, 8, 10, 12, 14, and 16 sticks to the pound, all sizes same price per pound.

### LICORICE LOZENGES.

We manufacture these goods in large quantities and of best quality and appearance. They are put up in beautifully decorated tin canisters of five pounds each, for counter display.

Very saleable, convenient, and profitable.

A Full Assortment

As the true value of Malt Extract depends on the amount of diastase it contains, it is very essential that such an extract be employed. The Buckland Malt Extract is guaranteed to be of the proper diastatic power, and will bear the most thorough test for diastase.

We are schertliously careful to retain ALL the delicate properties of the true MALT EXTRACT, preparing the same by an improved process. We succeed effectually in preventing all injury so often done to MALT EXTRACT by excessive heat in the preparation, and also in retaining ALL the time and pleasant arema of the Malt, which is so easily and often volutized and dispelled by both hurried and careless management. Whatever science, skill and determination can do in the preparation of this so important and indispensable medicinal remedy we pledge to the medical profession.

The following Starch Test for diastase is easily employed and will determine the value of the

Prepare a paste by uniting, say two drachms of starch, with three ounces water; boil until the

crystals are gelatinized, as Diastase produces no action on ungelatinized starch.

After the past has cooled to about 150° F., take one tablespoonful of it and add one teaspoonful of the Malt Extract, which should be thoroughly mixed with the paste by stirring. If there is the troper amount of Diastase in the Extract the thick starch paste will begin to be digested, and in a few minutes it will pour from the container in a thin liquid.

Dilute a small quantity of this liquid with three or tour times its bulk of water, maintain the heat at 700 to 150° F. for twenty or thirty minutes. If the starch has been transformed into Dretmice and Moltose (or Grape Sugar) a dark purplish red color will be developed, which in a short time will become

nearly colorless.

If the Extract has not contained the proper amount of Diastase the starch will not have been

If the Extract has not contained the proper amount of Dustase the starch will not have been transformed and a blue color will appear.

All our preparations are put up in bottles holding one and one-fourth pints, which is TWENTY FIVE PER CENT more Extract than any other make in the market, and guaranteed to be a Irue Malt Extract, made from the best Canadian Barley Malt, Also in bulk in x, 3, 5, and xo gal. cans, half barrels and barrels. Write for prices by gallon.

### DR. SCOTT'S ELECTRIC HAIR BRUSHES.

Owing to the unprecedented success attending the sale of these remarkable brushes during the past three years at \$3, and in response to a very general demand for Electric Brushes at less prices, the Pall Mail Electric Association have decided to place on the market a full line of these meritorious goods retailing at \$1, \$1.50, \$2, \$2.50, and \$3.

They are put up in sets on a handsome plated easel containing a sample of each half brush (5 in all) and one Electric Flesh Brush, producing a very pretty effect; being very compact, little space is needed to accommodate it on the counter or in the window. No charge is made for the easel, and we can conflictently excommend you to try one or two of these Easel Sets, and purchase out of sets as your demand may require.

#### THERE WILL BE NO EXTRA CHARGE FOR THE EASEL.

N. B.—Note that 24 sets

We are now ready to offer this new line of our DR, SS O OTT'S ELECTRIC BRUSHES, many of them at more popular prices than heretofore. The sale of the 48 Brush has been very large, but we have now decided to introduce others at lower prices, thus bringing them within the reach of all classes, It is predicted that a large demand will result, and we pledge ourselves to advertise them largely during 1833-84, in the best mediums as in past years.

MANUFACTURERS OF

### PLASTERS IN RUBBER COMBINATION.

We offer to the Trade a complete line of Plasters, of which we are the sole manufacturers and proprietors, confident in the belief that they are sold at prices as low as the high standard of excellence which has won for them popularity and professional endorsement in the past, will admit of.

#### BY A PROCESS OF OUR OWN

we combine the medicinal ingredients of our Plasters with PURIFIED RUBBER, without the use of solvents, a fact which we have made known in our advertisements during the last ten years. The process, original with us, other manufacturers are endeavoring to discover, and are publishing bombastic claims to be its inventors. Such claims, it is scarcely necessary to state, are wholly without foundation.

#### NEITHER TIME NOR CLIMATE

lessers the efficacy of our Plasters, and we are justified in saying that they produce effects fully commensurate with every allegation made in their behalf. Their remedial constituents are chemically combined in harmonious proportion, and no conflicting or impure elements enter into their composition, a fact demonstrated both by analysis and use.

#### SPECIAL PRODUCTS.

#### BELLANODYNE PLASTER

In which are combined the properties of our Belladonna and Capsicin Plasters, and the use of which we think cannot fail to win authoritative professional sanction.

CAPSICIN PLASTER,
Much cheaper and far superior to any plaster of a similar name.

AMERICAN SURGEON'S ADHESIVE PLASTER,
The most perfect adhesive plaster ever produced.

Porous Strengthening Plaster.

Mustard Plaster.

#### IMPROVED BELLADONNA PLASTER.

This Plaster is prepared from the alcoholic extract of Belladonna, manufactured at our laboratory, under the direct supervision of Prof. George F. H. Markoe, who brings to his task a profound knowledge of chemistry and its application to pharmaceutical processes. With the medicinal ingredients is combined washed and purified rubber, and the best material and most improved mechanical means are used in making it.

# DR. COLTON'S VEGETABLE

## DENTONIC

FOR

Cleansing the Teeth,

### HARDENING THE GUMS,

SWEETENING THE BREATH.

This compound, being strictly Vegetable, possesses no deleterious properties; on the contrary, its use not only Cleanses the Teeth, but prevents the formation of Tartar, so destructive generally to the gums. Its Tonic properties give Tone and Healthy Action to the Tissues. Invaluable in all kinds of Sore Mouth. Its pungent, Aromatic Taste renders it acceptable to the most fastidious.

Price, \$4.00 per Dozen Bottles; \$45.00 per Gross.
RETAIL PRICE, FIFTY CENTS PER BOTTLE.

N. B.—Dr. G. Q. Colton, it is well known, originated the anæsthetic use of nitrous oxide gas, in 1863, for the painless extraction of teeth. It seems but simple justice to him to state that at his office in the Cooper Institute, in New York, he has given the gas (up to May 1, 1883) to 134,200 Patients, without a single accident from its effects. The name of each patient is recorded and numbered. These facts afford sufficient proof that the gas, if properly made and administered, is a safe and efficient anæsthetic; and that Dr. Colton has been the means of conferring a lasting boon on humanity.

### W. H. Schieffelin & Co.

ARE SOLE PROPRIETORS OF

#### ANDERSON'S RHEUMATIC BALSAM.

This article has been in use for the last thirty years, and has proved a most efficacious remedy for the single disease for which it is particularly designed. The ingredients which enter into its composition are in themselves potent, but when combined, as in this Balsam, they seem doubly valuable for their anti-rheumatic power.

It is not necessary to enter into any discussion as to what Rheumatism is, or by what it is

occasioned. Every one who has felt a twinge of it, knows more about what it is than the most learned thesis can enable him to understand, either as to its insidiousness or its painfulness. The sufferer desires relief, and this he may find in the use of this Balsam, which is worthy of a place in every medicine-chest, either in the family or on shipboard.

The general directions for its use may be found on the label upon each bottle. Of course these may be modified—as far as the dose is concerned—to conform to the age of the patient

and the severity of the attack.

Price per dozen. \$4 00 Stamped.

#### A NEW AND VALUABLE SCIENTIFIC DISCOVERY.

#### THE ONLY SPECIFIC FOR WHOOPING COUGH.

Until the recent discovery of VAPO-CRESOLENE, medical skill was utterly baffled in its efforts to obtain

a rem-dy for this distressing and sometimes fatal disease.

The discoverer of Varo-Cresolarse, a Chemist, whose child was dangerously ill with Whosping Cough and too weak to be moved, beiseining that the active principle in the gas-works emanations existed in coad tar, volatilized it in the apartment of his sick child, obtaining almost instant relief. The child brightened, and in three or four days was entirely cured.

It was soon found that if heat come directly in contact with the metal containing the CresoLene in

It was soon found that it heat came directly in contact with the metal containing the Cristopers in appointment, a change was effected in its constituents; to prevent this the heat was intercepted by a disk before acting upon the cup. After many skillful experiments, the apparatus now used was decided upon as the best in its principles of construction, as shown by the cut,  $\frac{C_{\rm RESOLENE}(C_{\rm g} \mid H_{\rm g} \mid CH_{\rm g} \mid O)}{C_{\rm g} \mid G \mid H_{\rm g} \mid CH_{\rm g} \mid O)}$  is an exact product of coal tar related to carbolic acid, but possessing far greater power in destroying germs. "Atomizing" and "Spraying" have been adopted by a score of ingenious contrivances. These serve,

"Atomizing and Spraying have been adopted by a score of ingenious contrivances. These serve, however, to impregnate the atmosphere with a very diduct disinfecting solution but for an imment of time, as the particles weighted with water instantly gravitate to the floor. The use of Pastides is often very obsoxious to the sick. The snoke aggravates harg and throat troubles. But in vaporization, the strong, health-giving vapors of Cressollers are diffused by the air to every part of the room—not a crevice escapes. Gaments, bed-clothing, carpets, wall-paper and the air-passages of the patient are penetrated by this powerful antiseptic and outlinessmelds. tic and antispasmodic.

Microscopists have discovered in the air-passages of patients suffering from Whooping Cough, Catarrh, Asthma, Hay Fever, Diphtheria, Cranp, Sewlet Fever, and kindred diseases, countless numbers of bacteriat, little organisms, the lowest forms of lite. These are the media of infection. Chresoliteness the most powerful substance known to science as a destroyer of these germs. It has been completely demonstrated that the It is absolutely safe. The founds forms of the purpose are the media of injection. Christology is the most powerful substance known to science as a destroyer of these germs. It has been completely demonstrated that the plan now described is the best and simplest for the purpose. It is absolutely safe. The youngest child can not be harmed. The healthy person is not unpleasantly affected by inhaling it. The foulest odors of the sick-room and water-closet are instantly destroyed. The dangers from infection are neutralized. A score of patients can be treated in the same room. The apparatus is inexpensive. The lamp is useful in every household to give a faint but sufficient light at night.

CRESOLENE can be readily obtained from Druggists. Cough patients in the purifying houses of gas-works, also the remarkable results obtained by use of the VAPORIZER and CRESOLENE:

NEWPORT (R. I.) GAS Co., April 5, 1879. DEAR SIR: A year ago the past winter Whooping Cough was very prevalent here, and we had about 200 patients between two months and seventy-five years of age. I found that relief was obtained. Nearly all our physicians prescribed these visits. Liquid hydro-carbons are always found in the bottom of the purifying boxes when opened to change the lime. I see no reason why "Cresolene" should not be found. When the purifiers are first opened, there ensues a common absorbed.

doubtless volatilizes any light hydrocarbons which have been absorbed.

Yours truly, WM. A. STEDMAN, Treasurer. the purifiers are first opened, there ensues a chemical action which raises the temperature of the lime, and

FALL RIVER (MASS.) GAS Co., April 5, 1879. DEAR SIR: Large numbers of children afflicted with Whooping Cough are brought to our works. They cough but very little while here. Our men are not subject to contagious diseases

Yours truly, WM. R. DURFEE, Superintendent.

MANHATTAN GASLIGHT Co., N. Y., March 12, 1879.
My Dear Sir: Our purifying room is scarcely ever without children and adults suffering from Whooping Cough.

I have personally inquired of visitors as to the effects. All hear the same testimony, i.e., that relief is apparent. Children brought here in arms too weak to notice anything, are in a few days playing around the

room as merry as children only can be in health.

I have asked many physicians and chemists as to the probable cause, but never had it explained.

The fact was first noticed by a French physician about 15 years ago, in a paper read before one of their ties. Soon after we began to receive visitors. Very truly yours, C. V. SMITH, Engineer. Very truly yours, societies. Soon after we began to receive visitors.

There are many objections to exposure of patients at gas-works. The odors of Sulphuretted Hydrogen, Carbonic Oxide, and other imputities given off when the purifiers are opened, are exceedingly offensive. Adults accompanying sick children are often very disagreeably affected. The gas-works being located in the tenement-house districts, risk is experienced in visiting them. With the Cresolene and Vaporizers in use, an economical and simple remedy is within the control of every one.

JOHN MERRITT, M.D., of Brooklyn, in the N. Y. Medical Record, Dec. 6, 1879 — The apparatus is, I believe, unequaled in the treatment of Whooping Cough. I carnestly recommend it.

J. H. EGAN, M.D., IN THE Medical Summary, MAY, 1880.—Treated 14 cases Pertussis (Whooping Cough) with the Vaporizer and Cresolene. The average duration of treatment was eight days, the benefit being so immediate that the Vaporizers were not used every night. There was entire freedom from spasmodic coughing during the time the Vaporizers were at work.

I have treated common Colds and Sore Throats with invariable success; one night being usually suffi-

cient to effect a cure.

W. R. CHICHESTER, M.D., New York.-For disinfecting purposes it is immediately successful.

JOS. C. HUTCHINSON, M.D., BROOKLYN, -A good disinfectant and deodorizer in zymotic diseases,

H. M. WHITNEY & CO., DRUGGISTS, LAWRENCE, MASS., FEB. 4, 1880.—We have a very favorable opinion of your Vapo-Cresolene, not only in Whooping Cough but also in Croup.

CHAS. E. BRISTOI, DRUGGIST, ANSONIA, CONN., JAN. 29, 1880.—The Vapo-Cresolene was used in a case of Whooping Cough with most pleasing results, and although three children were coughing severely when its use was commenced, within a week's time almost a complete cure was effected.

A. A. TAYLOR, DRUGGIST, SUMMIT, N. J., Oct. 2, 1880.—Having sold the Cresolene and Vaporizer for the past twelve months, I take pleasure in adding my testimony as to the uniform satisfaction it has given those who have tested its merits. In every case it has alleviated, in a very marked and instantaneous manner, the troublesome and dangerous symptoms, which condition has been followed by a reasonably speedy recovery. Our doctor thinks highly of them and recommends them.

### CARBOLIZED ANTI-MOTH PAPER.

ABSOLUTE PROTECTION AGAINST

#### MOTHS, MILDEW, AND INFECTION.

CHEAP, CLEAN, FRAGRANT, HEALTHFUL,

The idea of treating paper with Carbolic Acid for protecting clothing, blankets, furs, etc., from moths and mildew, was first put in practice by the Quartermaster's Department of the U.S. Army, and a paper prepared by Capt. John F. Rodgers was foun 'to be not only proof against Moth and Mildew, but also an effective barrier against contagion, which is so often conveyed in Woolens. Its adoption by the Quartermaster's Department has resulted in the complete protection of one hundred own in ty million delivers worth a property, besides the saving of large sums hitherto expended for camphor, pepper, tobacco, and other ineffectual preventives.

An inquiry was instituted in July 1870, by Major-General M. C. Meigs, Quartermaster-General of the United States Army, as to the real merits of this paper. Extracts from report, of army officers are appended. Office Army Clothing and Equipage, Office Depot Quartermaster, David's Island,

OFFICE ARMY CLOTHING AND EQUIPAGE,
SAN FRANCISCO, CAL., Aug. 20, 1879.
The paper has been in use in the Qr. Mr. Dep't for twelve years. I am satisfied that this paper protecting articles of woolen clothing, afford; the best protection against moths of anything that has been brought to the attention of the Department. In addition to this, I have noticed that woolen clothing presents, upon opening, a fresh appearance, as though it had derived benefit from the antiscptic qualities of the Carbotic Acid.

GUSTAVUS A. HULL, Capt. and M. S. K., U. S. A.

GUSTAVUS A. HULL, Capt. and M. S. K., U. S. A.

OUARTERMASTER, DAVID'S ISLAND, NEW YORK HARBOR, August 12, 1879.
In my opinion, the paper is of great value in 
QUARTERMASTER GENERAL'S OFFICE, WASHINGTON, D. C., August 11, 1879.

In my opinion, the paper affords a complete tection.

STEWART VAN VLIET, Ass't Qr. Mr. Gen., U. S. A.

PHILADELPHIA DEPOT OF THE QR. MR.'S DEP'T, DEPOT QR. MR.'s OFFICE, WASHINGTON, D. C., PHILADELPHIA, August 4, 1879.
I have never opened a package that was properly August 7, 1879. I consider it an efficient and valuable article in packed with this paper, and found any damage by the protection and preservation of woolen clothing moth, or trace of them whatever. JOHN LIVERS, from ravages of the moth. A. F. ROCKWFLL, Capt. and M. S. K., U. S. Army.

Depot Quartermaster.

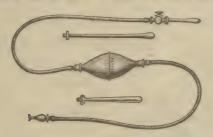

The pure Carbolic Acid used is not only FRAGRANT, but HEALTHFUL. This Carbolized Paper is perfectly cle in the very best disinfectant known and will not injure the finest fabrics. It is less expensive than Camphor, Pepper, or Tobacco. The odor passes away from garments on exposure as rapidly as does that of Camphor. It is put up in small packages suitable for domestic use, and can be obtained from wholesale and retail druggists. Each package is securely inclosed in a wrapper of Paraffine paper, which prevents evaporation of the Carbolic Acid until it is required for use.

Put up in quires of 25 sheets, ox 2 15 inches wide at 25 cents; and in reams of 20 quires at \$2.75 per ream. By case of 50 reams, \$2.50 per ream.

W. II. SCHIEFFELIN & CO., Sole Agents.

THE

# DAVIDSON SYRINGES.

### UNIVERSALLY ACKNOWLEDGED AS THE STANDARD.

A Perfect Instrument, that can always be relied upon,

#### IS THE CHEAPEST.

The DAVIDSON SYRINGES are recognized by the trade and profession as ahead of all other syringes for durability, pure stock and perfection of construction.

The trade never have any bad stock of DAVIDSON SYRINGES, which all retail druggists have learned by experience occurs with cheap syringes—namely, the rubber becoming hard, pipes corroding, valves being useless, &c., &c., and there is a great variety of these cheap goods put up in attractive and showy boxes constantly being offered.

In the construction of DAVIDSON SYRINGES only the finest rubber, pure block tin, best of stock and the most skilled labor are used, which accounts for the perfection of these goods and the increased demand for them.

We never cover our metals with nickel plate, or ornament the instrument in any way, in order to conceal inferior stock and bad work. The dangers arising from small particles of nickel scaling off of the lead or other cheap metal pipes, leaving the surface rough and corroded, are obvious.

We know that many of these cheap syringes are absolutely worthless and, in fact, dangerous to use, owing to the poor, adulterated stock of which they are composed, and this has been the experience of many others.

Our object is to make quality the first point to be gained and fix price accordingly. Nos. 1, 2 and 3 have block tin pipes, and No. 4 hard rubber pipes; but we can furnish hard rubber pipes to fit any of the above syringes if desired.

# TORSION BALANCE AND SCALE CO.,

46 to 50 East Second Street,

CINCINNATI. OHIO.

NOVEL IN CONSTRUCTION—ACCURATE IN USE—DELICATE, BUT STRONG.

DURABLE UNDER ALL CIRCUMSTANCES-NO KNIFF EDGES TO RUST OR WEAR. FRICTION.

#### EXPLANATION.

A. A.—Parallel compound beam.

B.—Immovable center frame, carrying index

B.—Immovable certain and beam.
C. C.—Movable frames, carrying the pans.
D. D. D.—Stretched gold wires over the frames, acting as central and terminal pivots. E.-Index.

F.—Weight for the purpose of elevating the center of gravity.
G. G.—Cups for pans.
H. H.—Pans.

I.—Arrest.
K. K.—Support to receive the weight of the scale when not in use.

Height of	Case,	-		-	-	-	-		-	-	9 i1	nches.	
Length	66 _		-	-	-	-	-	-	-		14	6.6	
Width .	66	-	-	-	-	-	-	-	-	-	81/2	+ 6	
Width of	Pans,	-		-	-	-	-	-	-		211	46	

The scales are fitted in a handsome black walnut box, with glass top, also has a spirit level attachment and grooved box for the weights.

The pans are made of burnished German silver. The scales are sensitive to 14 grain, even after years of constant use.

We do away with knife-edges, which are liable to lose their sensitiveness by becoming rusty, dull or fractured. There is no friction whatever in this balance, and cannot become inaccurate.

The only power to overcome, in our scales, is the torsional elasticity of the gold wires, which is much less than the frictional resistance of any knife-edge.

Usage can only decrease torsional elasticity, whereas frictional resistance is increased by worn knife-edges.

Our pans are constructed so as to remain in the center of the cup, thereby not changing the length of the beam.

> Price. \$30 00.

For sale at manufacturer's prices by W. H. Schieffelin & Co.

#### MORE ENTERPRISE.

# "Pinneer" Lint Manufacturers of America.

We have the honor of having established the first Lint Works on this Continent. We produce the Lint directly from the best quality of the Crude Cotton. We cleanse it, card it, spin it, weave it, bleach it, and finally lint it. No other manufacturer in the world makes it so completely. The machinery for its production is entirely new, and represents a revolution over past processes. Our lint is

LIGHTER, FLUFFIER, AND MORE ABSORBENT, AND IS TEARABLE IN ANY DIRECTION;

in fact, it represents a union of new improvements. In connection with our lint trade marks we shall add to all labels used in its packing the word "Pioneer," as "PIONEER" ABSORBENT HOSPITAL LINT.

SEABURY & JOHNSON, New York.

# PACKER'S TAR SOAP.

"THE STANDARD.

FOR SKIN AND SCALP DISEASES, NURSERY, TOILET, AND BATH.

It produces the results expected, and is the most satisfactory to consumers. It affords a liberal margin of profit. Its sale is continuous where once introduced. Can you ask better reasons for giving it preference?

#### CONVINCING. BRIEF

#### WHAT WHOLESALE DRUGGISTS SAY:

From W. H. Schieffelin & Co., New York .- "We consider Packer's the best and

most salable Tar Soap in the market.

From HALL & RUCKEL, New York .- "Long experience as dealers in PACKER'S Tar Soap, justifies us in pronouncing it the leading and standard article of the kind in this market.

From H. A. HURLBUT & Co., Chicago.—"We are selling more of PACKER's than all

other Tar Soaps combined."

From REDINGTON & Co., San Francisco.—"Sales of PACKER'S Tar Soap constantly From GEO. C. GOODWIN & Co., Boston.—" More extensively used than any other Tar Soap we know of."

From RICHARDSON & Co., St. Louis.—"We consider PACKER'S Tar Soap the best in

the market. From LYMAN, SONS & CO., Montreal,—"We have no hesitation in stating that we consider it (PACKER'S) without exception the best Tar Soap in the market. We know of several medical men of the best standing, who recommend it extensively.

MALTINE is a concentrated extract of malted Barley, Wheat and Oats. In its preparation the temperature does not exceed 150 degrees Fahr., thereby retaining all the nutritive and digestive agents unimpared. Extracts of malt are made from Barley alone, by the German process, which frects that the mash be heated to 212 degrees Fahr., thereby coagulating the Albuminoids and almost wholly destroying the starch digestive principle, Diastase.

LIST OF MALTINE PREPARATIONS.

MALTINE (Plain).
MALTINE with Hops.
MALTINE with Alteratives. MALTINE with Beef and Iron,
MALTINE with Cod-Liver Oil.
MALTINE with Cod Liver Oil and Pancreatine. MALTINE with Hypophosphites.
MALTINE with Phosphorous Comp.

MALTINE with Peptones.

MALTINE with Pepsine and Pancreatine.
MALTINE with Phosphates.
MALTINE with Phosphates, Iron and Quinia.
MALTINE with Phosphates, Iron, Quinia & Strych.
MALTINE Ferrated.
MALTINE WINE.
MALTINE WINE with Pepsin and Pancreatine.
MALTO-YERBINE.
MALTO-YERBINE.
MALTO-YERBINE. MALTINE with Pepsine and Pancreatine. MALTO-VIBURNIN.

#### MEDICAL ENDORSEMENTS.

We append, by permission, a few names of the many prominent Members of the Medical Profession who are prescribing our Maltine Preparations:

J. K. BAUDUY, M.D., St. Louis, Mo., Physician to St. Vincent's Insane Asylum, and Prof. Nervous Diseases and Clinical Medicine, Missouri Medical College

WM. PORTER, A.M., M.D., St. Louis, Mo.

E. S. DUNSTER, M.D., M.D., St. Louis, Mc.
Dbs. and Diseases Women and Children, University and in Dartmouth College.

THOMAS H. ANDREWS, M.D., Philadelphia, Pa., Demonstrator of Anatomy, Jefferson Medical College.

B. F. HAMMEL, M.D., Philadelphia, Pa., Supt. Hospital of the University of Pennsylvania.

Hospital of the University of Pennsylvania.

F. R. PALMER, M.D., Louisville, Ky., Prof. of Physiology and Personal Diagnosis, University of Louisville.

HUNTER McGUIRF, M.D. Richmond, Va., Prof. of Surgery, Medical College of Virginia. F. A. MARDEN, M.D., Milwaukee, Wis., Supt. and Physician, Milwaukee County Hospital.

P. YANDELL, M. D., Louisville, Ky., Prof. of Clinical Medicine and Diseases of Children,

Clivical Medicine and Diseases of Children, University, Louisville.

JOHN A. LARRABEE, M.D., Louisville, Ky., Prof. of Materia Medica and Therapeutics, and Clinical Lecturer on Diseases of Children in the Hospital College of Medicine.

R. OGDEN DOREMUS, M.D., LL.D., New York, Prof. of Chemistry and Toxicology, Bellevue Hospital Medical College; Prof. of Chemistry and Physics, College of the City of New York.

WALTER S. HAINES M.D. (Cheare III.)

WALTER S. HAINES, M.D., Chicago, Ill., Professor of Chemistry and Toxicology, Rush

Medical College, Chicago.

F. INGALLS, A.M., M.D., Chicago, Ill.,
Clinical Professor of Diseases of Chest and
Throat, Woman's Medical College.

MEUNIER, M.D., Montreal, Canada, Prof. Victoria University.

H. F. BIGGAR, M.D., Prof. of Surgical and Medical Diseases of Woman, Homocopathic Hospital

College, Cleveland, Ohio.
DR. DOBELL, London, England, Consulting Physics sician to Royal Hospital for Diseases of the Chest

scian to koyal Hospital for Diseases of the Cless.

DR. T. F. GRIMSDALE, Liverpool, England,
Consulting Physician, Ladies' Charity and
Lying-in Hospital.

WM. ROBERTS, M.D., F.R.C.P., F.R.S., Manchester, England, Prof. of Clinical Medicine,
Owens' College School of Medicine; Physician

Manhanter Paral Informacy and Linguistic Ass. Manchester Royal Infirmary and Lunatic Asy-

C. THOROWGOOD, M.D., F.R.C.P., London, England, Physician City London Hospital for Chest Diseases; Physician West London

Hospital.
C. PLAVFAIR, M.D., F.R.C.P., London, England, Prof. of Obstetric Medicine in King's College, and Physician for the Diseases of Women and Children to King's College Hospital.

W. H. WALSHE, M.D., F.R.C.P., Brompton, England, Consulting Physician Consumption Hospital, Brompton, and to the University Col-

A. WYNN WILLIAMS, M.D., M.R.C.S., London, England, Physician Samarian Free Hos-pital for Diseases of Women and Children. C. MACRAE, M.D., Calcutta, India, Dep. Insp. Gen. Hospital Ind. Service, late Pres.

EDWARD SHOPPEE, M.D., L.R.C.P., M.R. C.S., London, England. LENNOX BROWN, F.R.C.S., London, Eng., Senior Surgeon Central Throat and Ear Hos-

J. CARRICK MURRAY, M.D., Newcastle-on-Tyne, England, Physician to the N. C. H. for

J. A. GRANT, M.D., F.R.C.S., Ottawa, Canada.

MALTINE is prescribed by the most eminent members of the medical profession in the United States, Great Britain, India, China, and the English Colonies, and is largely used at the principal Hospitals in preference to any of the Extracts of Malt.

We will forward gratuitously a 1-lb. bottle of any of the above preparations to Physicians who will pay the express charges. Send for our 28-page Pamphlet on Maltine for further particulars.

Laboratory: Yonkers.

Address,

#### THE MALTINE MANUFACTURING CO.

IOHN CARNRICK, President, (Of REED & CARNRICK, Manufacturing Chemists and Pharmacists.)

# BEEF PEPTONOIDS,

A Concentrated Powdered Extract of Beef, Partially Digested and Combined with an equal portion of Gluten.

We have pleasure in presenting, for the consideration of the Medical profession, "Beef Peptonoids." We consider this product the most valuable that ever emanated from our Laboratory, and we feel confident it will be welcomed by the Profession in all parts of the world.

BEEF PEPTONOIDS contains only the nutritious portions of the beef. It contains no water and no inert matter of any kind. We combine the dry Extract of Beef with an equal portion of Gluten to prevent a tendency to deliquescense, and in order to present the preparation in a powdered and portable form. It is well known that Gluten is the most nutritious substance found in the Vegetable kingdom, and in nutritive elements is closely allied to Beef.

Four ounces of BEEF PEPTONOIDS represents as much nutritive and stimulating properties as forty-eight ounces of the best lean Beef.

Four ounces of BEEF PEPTONOIDS contains more nutritive elements than ten pounds of any Extract made by Liebig's formula, and from four to six times more Albuminoids and Fibrinoid's than any Beef Extract ever offered to the Medical Profession.

Our machinery and process for the production of BEEF PEPTONOIDS are perfectly adapted to the elimination of all inert portions of the Beef, and the retention of all the nutritive constituents.

BEEF PEPTONOIDS is much less expensive than any other preparation in the market, as it contains neither water nor inert matter.

The favor our preparation of BEEF PEPTONOIDS received at the hands of Drs. Agnew, Hamilton, Bliss, Reyburn, Woodward, Barnes, etc., the corps of eminent physicians, who employed the preparation with so much advantage in the treatment of the late President Garfield, proves conclusively its great value, not only as a food to be taken by the mouth, but also, how important an agent it has been found in feeding by the rectum.

Please refer to the very able article of Dr. D. W. Bliss, in New York Medical Record, July 15th, 1882, in which he so frequently refers to BEEF PEPTONOIDS having been used to so great an advantage not only in the case of the late President Garfield, but many others as well.

We employ a reliable and experienced person to select the Beeves before they are slaughtered, and to superintend the killing and dresssing. Great care is exercised in this respect, and none except the most healthy and suitable beeves are employed in making our BEEF PEPTONOIDS.

Every physician will appreciate the importance of this care, for an extract made from diseased beef would not only be deleterious, but would in many cases produce lasting injury and fatal results.

The use of BEEF PEPTONOIDS is indicated as follows:

Convalesence from all diseases, Fevers, Pneumonia, Weak Digestion, Diarrhoea, Dysentery, Phthisis, Cholera Infantum, Marasmus, Sea Sickness, Excessive use of Alcoholic Stimulants. Per Rectum in all cases where the stomach cannot digest the food, and in debility resulting from any cause. Also a valuable adjunct in voyages and camp life.

We will be pleased to have the profession everywhere test our assertions regarding this preparation, and for that purpose we will be happy to mail a sample to any regular practitioner desiring it; also circulars fully explanatory.

Thanking the profession for generous support in the past, we beg to remain, Very respectfully,

### REED & CARNRICK,

182 Fulton Street, New York.
